What Is Edpuzzle?

A comprehensive interactive learning platform that empowers teachers to transform any video into an engaging, active learning experience.

AI Teacher Assist: Your Question-Generating Powerhouse

Automagical Question Generation

Create open-ended and multiple-choice questions with just one click, transforming any video into an interactive assessment instantly.

Smart Video Analysis

AI analyses video content and narration intelligently to generate relevant, meaningful questions aligned with learning objectives.

Time-Saving Technology

Reduce lesson preparation time from hours to mere minutes, freeing you to focus on what matters.

Optimal Question Placement

Questions are automatically inserted at strategic points in the video to maximise engagement and comprehension.

Revolutionary AI Auto-Grading

01

Instant Open-Ended Grading

02

Intelligent Response Evaluation

03

Real-Time Student Feedback

04

Teacher Control & Override

Core Interactive Features

Video Upload

- Use YouTube, Khan Academy, TED-Ed sources
- Upload your own recorded lessons
- Crop videos to relevant sections
- Embed questions at any point
- Add audio notes and explanations

Student Engagement

- Gamification elements for motivation
- Multiple attempts to build resilience
- Audio response options available
- Closed captions for accessibility
- Prevent skipping to ensure viewing

Assessment & Analytics

- Real-time progress tracking
- Detailed learning analytics
- Class performance snapshots
- Individual student data tracking
- Automatic grading and results

Ready-to-Go Content Library

Thousands of Teacher-Created Lessons

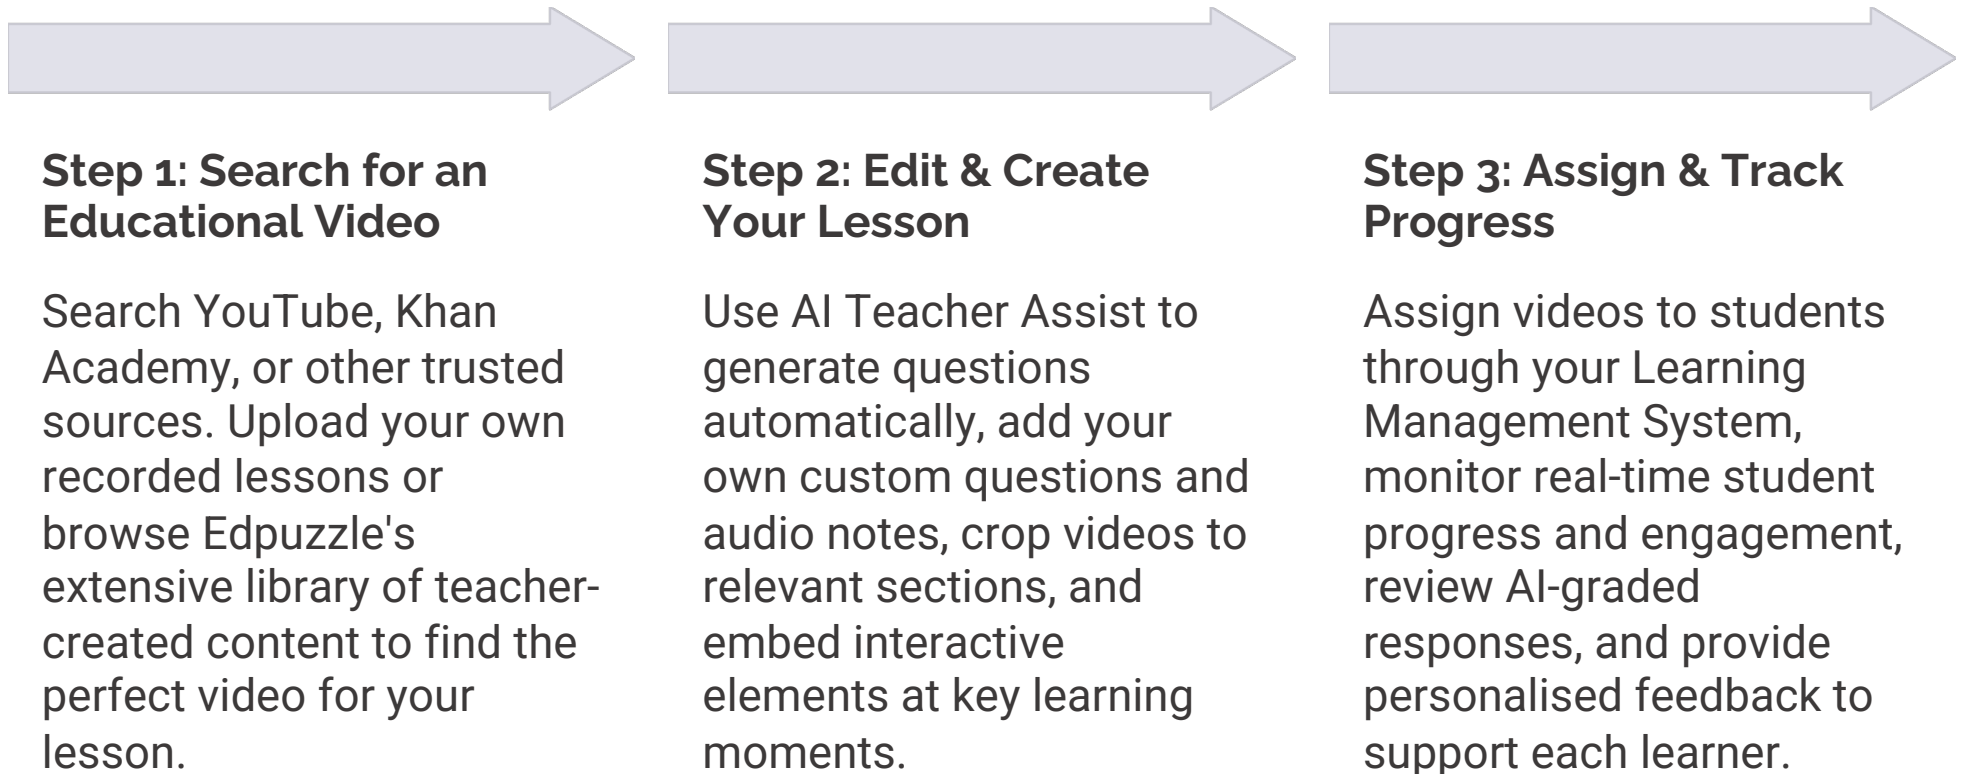

Standards-Aligned Content

Cross-Subject & Grade Level Coverage

Collaborative Teacher Community

Simple 3-Step Process

Powerful Classroom Applications

Flipped Classroom

Assign videos for homework to cover foundational theory, freeing up valuable class time for discussions, problem-solving, and hands-on practice activities.

Formative Assessment

Check understanding after lessons in real-time, identify students who need extra support early, and adjust instruction based on immediate data insights.

Remote & Hybrid Learning

Engage students learning from home effectively, maintain accountability with progress tracking, and provide consistent, high-quality learning experiences regardless of location.

Differentiation

Assign different videos to different student groups based on needs, allow multiple attempts for struggling learners, and provide audio options supporting diverse learning styles.
