Match the definition to the correct term.

If the outcome of one event does not affect the other event, the events are _____

Outcome

The _____ of rolling a 3 on a number cube is 1/6

Theoretical Probability

The opposite of the favorable outcome is _____

Tree Diagrams

_____ or relative frequency, is based on what actually occurs during an experiment.

Independent Events

What is one activity you enjoyed doing during your Spring break?

Write your answer...

Answer recorder (optional) - Voice

#1.] Match the vocabulary word to its definition.

Interest Rate

Interest calculated only on the principal amount of a loan or deposit.

Simple Interest

The initial amount of money borrowed or invested.

Compound Interest

The cost of borrowing money.

Principal

Interest calculated on the principal amount AND the interest that accumulates on it in every

- 1) Know basic terminology related to a routine office visit.
- 2) Know the purpose of tracking vitals.
- 3) Know the test, tool and measurement used when tracking vitals.
- 4) Know the tests run on major organs when testing in the office along with the tools and measurements used.
- 5) Recognize and know the purpose of blood components.
- 6) Know what is included in a Complete Blood Count and what can be diagnosed from it.
- 7) Know the steps involved in taking blood.
- 8) Know why cholesterol is important to the body, the types, and which ones are good and bad for the body.
- 9) Know what a Basic Metabolic Panel (BMP) tests for, why it matters, and what it can diagnosis.
- 10) Be able to diagnose basic diseases from testing results learned in class.

Read the information provided and fill in the blank with the correct term.

- 1) A record of information about a patient's past and current health. Includes information about the patient's habits, lifestyle, and even the health of their family is called a _____
- 2) Any subjective evidence of disease a patient perceives, such as aches,
