Flipped Classroom

Flipgrid

- A flipped classroom is an instructional strategy and a type of **Blended Learning** where students are **introduced to content** at **home** and **practice** working through it at **college/school**.
- In this blended learning approach, **face-to-face interaction is mixed with independent study- usually via technology**.
- In Flipped Classroom approach, students might **watch pre-recorded videos at home**, then **come to College/school to do the homework armed with questions** and at least some **background knowledge**.

Flipped Classroom

- A "**Flipped classroom**" is focused on **student engagement** and **active learning**, giving the instructor a better opportunity to deal with mixed levels, student difficulties, and differentiated learning styles during in-class time.
- In a flipped classroom, students watch **Online Lectures**, **collaborate in online discussions**, or **carry out research at home** while **engaging in concepts in the classroom** with the guidance of a mentor.
