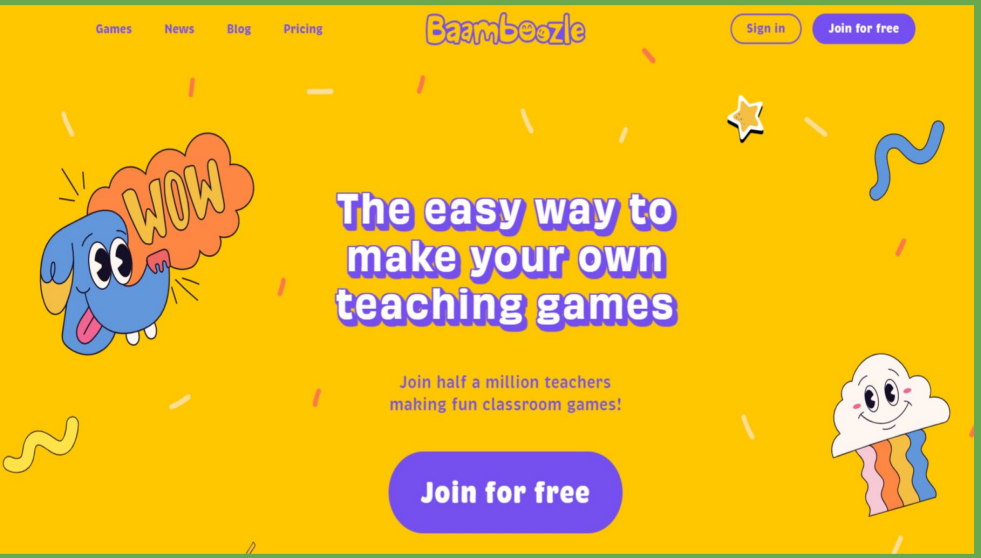
GAME BASED LEARNING THROUGH BAMBOOZLE

https://www.baamboozle.com/quiz/745955

Baamboozle



- Baamboozle is a game-style learning platform that works online to offer accessible and fun interactivity for the class and beyond.
- Online-based learning platform that uses games to teach
- Range of Tailor made-ready to use games
- Half million customized quizzes

Baamboozle

- Wide selection of games to get your students started right away
- Add your own
- In class use and remote learning as well as homework
- Take a quiz in class as a group
- Share it for online lessons
- Used for individual task
- Used for wide range of ages
- An opportunity to encourage creativity

How does Baamboozle work?

- No need for an initial registration
- For more features such as assessment tools and creation abilities, it pays to sign-up.
- Enter a game section and you're given options along the left to "Play," "Study," "Slideshow," or "Edit."

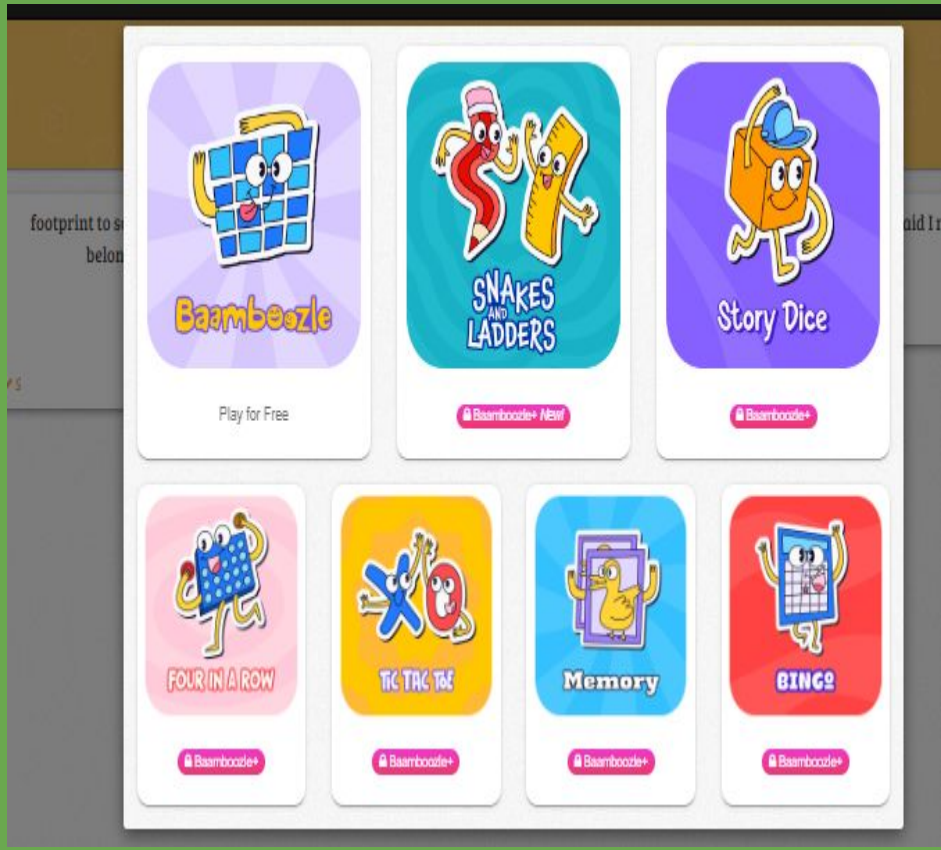
Play gets you right into game options such as Four In A Row or Memory, to name just two.

- Study lays out the image tiles for you to select right or wrong on each to suit the topic.

- Slideshow does similar but simply shows the images and text for you to scroll through.

- Edit, as you may have guessed, lets you edit the quiz as needed.

- Teams can be created so you can split the class into two and have the groups compete or have one-on-one competitions. Baamboozle keeps track of scores so you can engage with students as the games go on, without being distracted by scoring.
- While "Edit" will let you amend games to suit your needs, if you want to create your own, then you will need to register with your email.

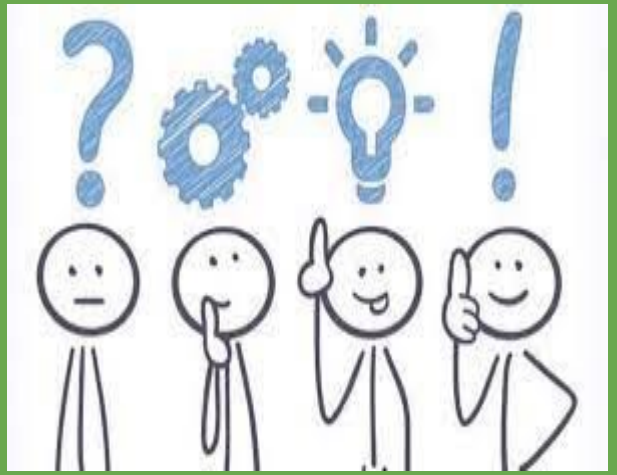


Features

- Students can make quizzes (In team or Individual)
- Used in classes but could also serve as a remote learning assistant since it offers a gamified learning experience.
- No prescribed for order for questions- pull the questions from question bank
- cover a variety of topics without feeling repetitive
- Add turned off, if the question is difficult
- Hit pass on questions, if the students want
- Each games allows up to 24 questions- keep the question limit considering classroom learning

uses

- Tools enable Language Learners, Science, Maths, Social Science and etc. to be creative
- Promote curiosity and communication among students and teachers
- Vocabulary
- Problem Solving Ability
- Fun while learning
- Assessment
- Tacher



In Classroom Practice

1. Assess the class

Create a game as an assessment to assess how well students have understood what has been taught.

2. Innovative class

Students should be divided into groups and be given a topic to create a game on, then be asked to take quizzes created by their classmates. Assess based on question quality as well as answers so you don't just have one team trying to make the tougher quiz.

3. Plan your project

Connect your device to a projector, or run directly using a browser on a large screen, and have the class take part in games as a group. This allows for stops to discuss and expand on topics and terminology.
