**How can we engage learners today?
हम शिक्षार्थियों को कैसे जोड सकते हैं?**

Use technology! तकनीक का प्रयोग

GOOGLE EARTH क्या है?

- मुफ्त डाउनलोड करने योग्य कार्यक्रम
- Allows users to virtually explore the globe (यह उपयोगकर्ताओं को ग्लोब तक वास्तविक रूप से पता लगाने की अनुमति देता है)
- Uses satellite imagery (यह उपग्रह इमेजरी का उपयोग करता है)
- Allows users to fly around the glob (यह उपयोगकर्ता को पूरे विश्व का भ्रमण करवाता है।)
- Allows users to create their own tours and paths
- Allows virtual exploration of Landforms include hills, mountains, plateaus, canyons, and valleys, as well as shoreline features such as bays, peninsulas, and seas.

Why use Google Earth? गूगल अर्थ का इस्तेमाल क्यों करें?

- Free मुफ्त
- Easy to use इस्तेमाल में आसान
- Good for many subject areas कई विषय क्षेत्रों के लिए अच्छा है
- Strengthens technology skills प्रौद्योगिकी कौशल को मजबूत करता है
- Provides a real world look at the physical earth (grasslands, deserts, mountains, fjords, etc) भौतिक पृथ्वी पर एक वास्तविक दुनिया प्रदान करता है (घास के मैदानों, रेगिस्तान, पहाड़, आदि)
- Allows visual exploration of news around the world दुनिया भर के समाचारों को दृश्यात्मक रूप से देखने की अनुमति देता है
- Great for learning about history and geography इतिहास और भूगोल संबंधी विषयों के लिए बहुत अच्छा है

Why are teachers using Google Earth?

शिक्षक गूगल अर्थ का उपयोग क्यों कर रहे हैं?

- You can expose learners to the world beyond your school and community. Flying learners from the deserts of Africa to the CN Tower to Antarctica brings a wide range of subject matter alive.
- आप विद्यालय और समुदाय से परे अपने विद्यार्थियों को सारे विश्व से परिचय करवा सकते हैं।
- Fly to the world.
- Learners can use Google Earth to investigate places they are studying.
- शिक्षार्थी Google अर्थ का उपयोग उन स्थानों की जांच करने के लिए कर सकते हैं, जिनका वे अध्ययन कर रहे हैं।
- आप हर उस जगह जहां आप वास्तविक रूप से गए हों या न गए हों, इसके माध्यम से ज़रूर जा सकते हैं।
- Its interactive nature encourages users to keep using it to fly to places they used to live in or new places, or scenes of events in the news, or parts of the world they may never visit in person.
- इसकी संवादात्मक प्रकृति उपयोगकर्ताओं को नए तथा उन स्थानों पर जहां वे रहते थे, उड़ान भरने और इसका उपयोग करने के लिए प्रोत्साहित करती है या समाचारों में घटनाओं के दृश्य, या दुनिया के कुछ हिस्सों में वे कभी नहीं जा सकते हैं।

What can I explore?

मैं क्या पता लगा सकता हूँ?

- You can zoom in and explore any place on earth, but . . . many smaller places have very low resolution.
- For example, Yellowknife (Canada) is well marked and has high resolution, whereas Fort Providence has low resolution and does not show street level.

How do I learn more about Google Earth?

मैं Google अर्थ के बारे में और अधिक कैसे जान सकता हूँ?

Check out these blogs, user groups and forums that share ideas and experiences about using Google Earth in the classroom, as well as lesson plans and activities.

- [Google for Educators](#) (शिक्षार्थियों के लिए Google)
- [How to Teach with Google Earth](#) (Google अर्थ के साथ कैसे शिक्षण करें)
- [The Best Resources for Google Earth for Beginners](#)

What are some easy things I can do? कुछ आसान चीजें हैं जो मैं कर सकता हूँ?

- View an image of your school, home, or any place on Earth.
- Go on a world tour.
- View other cool locations and features created by other Google Earth users.
- View 3D terrain of a place.
- View 3D buildings.
- View weather information.
- View historical maps.

Online tutorials

- Google Earth offers excellent beginner tutorials for using the program.
- Check them out:

Search panel

The image shows a screenshot of the Google Earth desktop application. The main window displays a "Feature tour" page. On the left side, there is a sidebar with several panels: "Search", "Places", and "Layers". The "Search" panel is active, showing a search bar with the text "Fly to e.g., Hotels near JFK" and a magnifying glass icon. Below the search bar, there are tabs for "Find Businesses" and "Directions". The "Places" panel shows a list of saved locations, including "Sahcoosing, TX", "Irving", "Yellowknife, NT, Canada", and "Fort Providence, NT, Canada". The "Layers" panel shows various map layers like "Primary Database", "Borders and Labels", "Places", "Photos", "Roads", "3D Buildings", "Ocean", "Weather", "Gallery", "Global Awareness", and "More".

The main content area of the "Feature tour" page includes a "How to:" section with a link to "What is Google Earth?", an "Overview of Google Earth" section, a "Users:" section with a link to "Click on the blue button to start the Tour", and a "Frequently Asked Questions" section. A prominent blue button labeled "Get started" is visible in the top right corner of the main content area.

Overlaid on the bottom right of the Google Earth interface is a yellow "Search Panel" dialog box. The dialog box contains the following text:

Search Panel

Use the corresponding tabs to search for specific places, find a business, or get directions in Google Earth. Once you enter your search term, select **Enter** or click on the magnifier button. Google Earth will then zoom in on your place of interest.

Continue to next step >>

The background of the dialog box shows a 3D view of the Earth from space, with a compass and navigation controls visible on the right side. At the bottom of the 3D view, there is a coordinate display: "25°33'40.89" N 57°25'14.03" W elev -5525ft alt 12858.83 km".

Place panel

The image shows a screenshot of the Google Earth application interface. The main window displays a 'Feature tour' page with a 'Get started' button. A yellow tooltip titled 'Places panel' is overlaid on the interface, providing information about the Places panel. The tooltip text reads: 'The places panel displays your current Google Earth file(s) that are open. There are two main sections: 1. My Places - This includes files that are saved on your computer. 2. Temporary Places - This folder includes files that you have opened in your most recent session in Google Earth. Be sure to move files that you would like to save permanently under My Places with a simple drag and drop. You can control which files to 'turn-on' or 'turn-off' in the 3D view by selecting the checkbox on or off, respectively.' The background shows the Google Earth interface with the 'Places' panel on the left and the 'Layers' panel at the bottom. The 'Places' panel shows 'My Places' and 'Temporary Places' folders. The 'Layers' panel shows various layers like 'Primary Database', 'Borders and Labels', 'Photos', 'Roads', '3D Buildings', 'Ocean', 'Weather', 'Gallery', 'Global Awareness', and 'More'. The main 3D view shows a globe with a tooltip for 'Places panel'.

Places panel

The places panel displays your current Google Earth file(s) that are open. There are two main sections:

1. **My Places** - This includes files that are saved on your computer.
2. **Temporary Places** - This folder includes files that you have opened in your most recent session in Google Earth. Be sure to move files that you would like to save permanently under My Places with a simple drag and drop.

You can control which files to 'turn-on' or 'turn-off' in the 3D view by selecting the checkbox on or off, respectively.

<< Previous step | Continue to next step >>

Layers panel

The image displays the Google Earth desktop application interface. On the left, the 'Layers' panel is visible, showing a tree view of data layers including 'Primary Database', 'Borders and Labels', 'Places', 'Photos', 'Roads', '3D Buildings', 'Ocean', 'Weather', 'Gallery', 'Global Awareness', and 'More'. The 'Layers' panel is currently expanded to show the 'Earth Gallery' view.

The main window displays a 'Feature tour' page. The page title is 'Feature four'. The content includes a 'How to' section with a link 'What is Google Earth?', an 'Overview of Google Earth' section, 'Users', 'Frequently Asked Questions', and a 'Feature tour' section with a link 'Release notes' and a note 'New features in Google Earth 6'. A blue button labeled 'Get started' is present in the top right corner of the page.

A yellow tooltip titled 'Layers panel' is overlaid on the interface, providing the following text: 'The layers panel allows you to customize your view by turning layers on or off. Select the layer by checking the box, or deselect the layer by unchecking the box. Expandable layers have a "+" sign that you can click for more detailed options within that specific category.' Below the text, there is a link 'Learn more about different layers.' and navigation arrows: '<< Previous step | Continue to next step >>'. The tooltip is positioned over the 'Layers' panel in the bottom right corner of the Google Earth window.

The Google Earth window title bar shows 'Google Earth' and the menu bar includes 'File', 'Edit', 'View', 'Tools', 'Add', and 'Help'. The address bar shows 'http://support.google.com/earth/answer/1717171/feature-tour - Google Earth Help'. The search bar contains 'Fly to e.g., Hotels near NY'. The 'Layers' panel is expanded to show the 'Earth Gallery' view.

Hide sidebar

The image shows a screenshot of the Google Earth application window. The main window title is "Google Earth" and it contains a menu bar (File, Edit, View, Tools, Add, Help) and a toolbar. The address bar shows "http://support.google.com/earth/.../feature_tour...". The main content area displays a "Feature tour" page with the following text:

New features in Google Earth 6

Google Earth is a powerful tool that enables you to fly anywhere on Earth to view satellite imagery, maps, terrain, 3D buildings, from galaxies in outer space to the canyons of the ocean. To help get you started, we've prepared a guided tour to familiarize you with the product.

Click on the blue button to start the Tour.

Learn about the features of Google Earth by taking a quick tour

Get started

Overlaid on the bottom right of the main window is a smaller, semi-transparent window showing a 3D view of Earth. This window has its own search and layers panels. A yellow tooltip box is positioned over the top-left corner of this smaller window, with the following text:

Hide sidebar

The hide sidebar button allows you to expand your 3D View by hiding the left side panel that includes the search, places, and layers panels. To restore the left side panel, select the hide sidebar icon again.

<< Previous step | Continue to next step >>

The 3D view window also shows a search bar, a "Places" panel, and a "Layers" panel. The "Layers" panel is expanded to show "Primary Database" with sub-items: Borders and Labels, Places, Photos, Roads, 3D Buildings, Ocean, Weather, Gallery, Global Awareness, and More.

At the bottom of the 3D view window, there is a coordinate display: "25°33'40.66" N 57°25'14.03" W elev -5929m alt 12856.83 km" and a "Google" logo.

Add a placemark

The image shows a screenshot of the Google Earth web application interface. The main content area displays a "Feature tour" page with a "Get started" button. A yellow dialog box titled "Add placemark" is overlaid on the 3D viewer, explaining how to use the placemark icon. The 3D viewer shows a satellite view of Earth with a placemark icon at the top. The interface includes a search bar, a "Places" panel on the left, and a "Layers" panel at the bottom left. The "Places" panel shows a list of saved locations, including "Subzeroing Tour" and "Wabunife, NS, Canada". The "Layers" panel shows various map layers like "Borders and Labels", "Places", "Photos", "Roads", "3D Buildings", "Ocean", "Weather", "Gallery", "Global Awareness", and "More". The "Add placemark" dialog box contains the following text:

Add placemark

Add a placemark to any spot in the 3D viewer with this icon. Once selected, you can drag and drop the pushpin to your exact location. Customize your placemark by typing a name, adding a description, or even changing the icon shape and color. The placemark will automatically be added to your places panel, where you can select or deselect your placemark at any time.

<< Previous step | Continue to next step >>

updated 12/04/2011

Add a polygon

The image shows a screenshot of the Google Earth application interface. The main window displays a 'Feature tour' page with a blue 'Get started' button. A yellow tooltip titled 'Add polygon' is overlaid on the Earth view, providing instructions on how to create and customize a polygon. The interface includes a search bar, a 'Places' sidebar with 'My Places' and 'Temporary Places', and a 'Layers' sidebar with 'Earth Gallery' and various map layers like 'Borders and Labels', 'Photos', '3D Buildings', 'Ocean', 'Weather', 'Gallery', and 'Global Awareness'. The Earth view shows a satellite image of the Earth with a white arrow pointing to a location. The tooltip text reads: 'You can also add a polygon to highlight different areas of Google Earth. A four square box will appear and by left-clicking your mouse on the box, you can add corners to your shape. Change the location of each corner by dragging and dropping the tiny squares. Customize your polygon by changing the style, color, view, and altitude. You can even view the perimeter and area of the polygon under the Measurements tab.' Navigation arrows at the bottom of the tooltip allow moving to the previous or next step.

New features in Google Earth 6

Google Earth is a powerful tool that enables you to fly anywhere on Earth to view satellite imagery, maps, terrain, 3D buildings, from galaxies in outer space to the canyons of the ocean. To help get you started, we've prepared a guided tour to familiarize you with the product.

Click on the blue button to start the Tour

Learn about the features of Google Earth by taking a quick tour!

Get started

A yellow tooltip titled 'Add path' is overlaid on the interface, containing the following text:

Add path

This icon allows you to add a path or trail. Similar to the polygon tool, a four square box will appear and by left-clicking your mouse on the box, you can start selecting the turns to your path. You can even view the elevation profile of your path by selecting Edit > Show Elevation Profile.

<< Previous step | Continue to next step >>

The interface also shows a search bar with 'Fly to e.g., 37.407225, -122.107362', a 'Places' sidebar with 'My Places' and 'Temporary Places', and a 'Layers' sidebar with 'Earth Gallery' and various map layers like 'Primary Database', 'Borders and Labels', 'Places', 'Photos', 'Roads', '3D Buildings', 'Ocean', 'Weather', 'Gallery', and 'Global Awareness'.

Add an image overlay

The image shows a screenshot of the Google Earth desktop application. The main window displays a 'Feature tour' page with a 'Get started' button. A yellow dialog box titled 'Add image overlay' is open over the globe, providing instructions on how to add and adjust an image overlay. The dialog box text is as follows:

Add image overlay

Add an image to overlay a place of interest in Google Earth. After selecting this icon, enter the URL of your desired image to overlay, or upload an image on your computer by selecting the Browse button.

You can adjust the size of the image by dragging and dropping the green edges, or change the position of the image by dragging and dropping the green crosshairs in the center of the image. The transparency of the image can be adjusted with the scale toolbar.

[Learn more about using image overlays](#)

<< Previous step | Continue to next step >>

The background interface includes the 'Search' bar, 'Places' list (with 'My Places' and 'Temporary Places'), and 'Layers' panel (with 'Earth Gallery' selected). The globe shows a view of Earth with a small image overlay visible. The bottom of the globe displays coordinates: 35°33'40.66" N, 57°25'14.03" W, elev: -5525m, alt: 12856.83 km. The Google logo and 'Data SIO, NOAA, U.S. Navy, NGA, GEBCO Image IBCAO' are also visible at the bottom of the globe view.

Record a tour

The image shows a screenshot of the Google Earth application interface. The main window displays the 'Feature tour' help page, which includes a 'Get started' button and instructions on how to use the software. A yellow dialog box titled 'Record a tour' is overlaid on the interface, providing instructions on how to create and record a tour. The dialog box text reads: 'Create a tour of your favorite spots around the world! Once you select the icon, a tour box will appear at the lower left of your screen. To start recording, select the red button to start your tour - your voice will be recorded as you navigate through the world. Once you are done, select the same red button to stop. Make sure to save your tour! Learn more about using tours.' Below the dialog box, there are navigation arrows: '<< Previous step | Continue to next step >>'. The background shows the Google Earth interface with various panels like 'Search', 'Places', and 'Layers' visible. The main view shows a 3D globe of the Earth with a red arrow pointing to a location in the Atlantic Ocean. The status bar at the bottom indicates coordinates: '25°39'40.69" N 57°25'14.03" W elev -5525m alt 12856.83 km' and the Google logo.

Share through Email, Print or View in Google Maps

You can email any of the following:

1. A graphic file (.jpg) of your current view in Google Earth.
2. A file which will open your current view in Google Earth.
3. A file which will open as a Placemark/Folder in Google Earth.

To print, select the Print icon for a list of print options for Google Earth.

For a Google Maps view of your current display in Google Earth, select the icon and Google Maps will appear in an embedded browser.

The basics

- The following pages show some of the basics to get you started using Google Earth.

Download Google Earth

The screenshot shows the Google Earth website interface. At the top, there is a navigation bar with links for Home, Explore, Download, Learn, Connect, and Help. The main content area features a large image of a 3D city model. To the right of this image is a prominent blue button labeled "Download Google Earth 6". Below this button, there is a list of features: "Fly to any place around the world.", "See 3D buildings, imagery, and terrain.", and "Find cities, places, and local businesses." Further down, there are sections for "Products Overview", "Showcase", and "Learn". The "Products Overview" section lists "Desktop", "Earth in Google Maps", and "Mobile". The "Showcase" section includes "3D Buildings", "Historical Imagery", "Oceans", and "3D Trees". The "Learn" section has a "Your World in 3D" section. At the bottom, there are links for "Looking for specific information?" and "Want to keep up-to-date?". A blue arrow points from the top right towards the "Download Google Earth 6" button.

launch the program.

Always read the tip of the day!

The image shows a screenshot of the Google Earth application window. The main view displays a 3D globe of Earth. A 'Start-Up Tip' dialog box is overlaid on the globe, featuring a blue header and a white body. The tip is titled 'Tip: Land on the Moon' and includes a photograph of the Apollo 11 lunar module on the moon's surface. The text of the tip reads: 'Explore the moon in Google Earth. Take tours of landing sites, view 3D models of landed spacecraft, zoom into 360-degree photos and watch rare TV footage of the Apollo missions.' Below the text is a small thumbnail image of the Google Earth interface with the Moon selected. The tip concludes with: 'To start exploring, select Moon from the top toolbar or click View > Explore > Moon.' and a link: '[Learn more about Moon in Google Earth >](#)'. At the bottom of the dialog box are buttons for 'Previous Tip...', 'Next Tip...', a checked 'Show tips at start-up' checkbox, and a 'Close' button. A blue arrow points from the top right of the slide towards the 'Close' button. The background interface includes a search bar, a 'Places' sidebar with 'My Places' and 'Temporary Places', and a 'Layers' sidebar with various map layers like 'Primary Database', 'Streets and Labels', 'Photos', 'Roads', '3D buildings', 'Ocean', 'Weather', 'Satellite', 'Global Awareness', and 'More'. The bottom status bar shows coordinates (8°53'16.62" N, 92°48'21.45" W, elev. -12036 ft), distance (Eye at 6635.90 mi), and the Google Earth logo. The Windows taskbar at the very bottom shows the Start button and several open applications.
