Modes of Online Communication

A CyberPeace Foundation Presentation

Digital communication uses technology to reach a larger audience in minimal time and with minimal effort, thus helping in the quick and efficient dissemination of information.

We shall cover

- ▶ **Types of communication**
- ▶ **Communicating styles**
- ▶ **Communication platforms**
- ▶ **How much and what to share and with whom**
- ▶ **Safe practices for secure communication**

The safest communication method is talking face-to-face.

Online, we have to consider many factors to make communications safe.

A man in a dark patterned shirt stands in the center of a room, gesturing with his hands as if presenting. He is surrounded by several people seated in white chairs, some of whom are looking towards him. The background features a whiteboard and a desk. The entire scene is overlaid with a blue tint.

Communication Styles

Offline Vs. Online

Offline Communication

Verbal: Face-to-face with one or more people; telephonic conversations using traditional sets; radio and TV broadcasts

Non-verbal: body language; tone; eyes; gestures; attire and actions

Written: Letters; handwritten or typed memos; messages in school diaries; printed books and magazines

Signs: Sign language; mime

Visuals: Charts; maps; logos

Digital Communication

Verbal: Calls via smartphones; video calls; audio messages; recorded videos; live-streaming of content; OTT platforms

Non-Verbal: Use of emoticons and emojis

Written: Webpages; E-mails; messages via messaging apps, Chat boxes, gaming apps; PDF docs and PPT; popups on screens; notes and memos from the institution where one studies or works; shared drives; Blogs and micro-blogs

Visual: Video blogs; podcasts; recorded videos

A futuristic server room with blue lighting and two people in the background. The room is filled with server racks and glowing blue lines, creating a high-tech atmosphere. Two people are standing in the center, looking at a screen or device. The text is overlaid on the image in a white, sans-serif font.

Despite its various advantages,
digital networking has some
limitations that may hinder
smooth and efficient
communication

How Do Digital Users Communicate?

- » **Encrypted e-mails:** Gmail, Outlook
- » **File-sharing apps:** OneDrive, Google
- » **Encrypted IM Apps:** Messenger, Telegram, WeChat, Signal, Viber, Threema, Text Vault
- » **Video and Image Hosting apps:** YouTube, Vimeo
- » **Chatrooms:** Omega, Chatroulette, MeetYou.Me
- » **Gaming apps:** Discord
- » **Social media apps:** Meta, Insta
- » **Blogs and micro-blogs:** Twitter, TechCrunch
- » **Professional networking:** LinkedIn

Points to Keep in Mind While Using Comm Tools

Social media Apps

- ▶ Help us to connect, communicate, and build relationships.
- ▶ They enable us to reach out to the maximum number of people and build a trusted, dependable clientele, audience, or peer group.
- ▶ Need to stay authentic, interesting, and relevant.

File Sharing Apps

- ▶ Very useful for a large number of people, working in an organization, to share, discuss and work on the same files.
- ▶ Downloading a file through a P2P network is generally riskier than downloading it from a website, for bad actors can send along malware.

Instant Messaging Apps

- ▶ Real-time messaging that enable users to exchange voice, video, text, attachments, file links, etc
- ▶ Have become very popular with digital users
- ▶ Increasingly used by Customer Support of various businesses
- ▶ Can lead to sharing of malware and data breach

Video and image Hosting Apps

- ▶ Users can upload, manage and share their photos and videos, both publicly or privately
- ▶ They are usually safe unless the password gets breached

Chatrooms

- ▶ Maybe moderated, unmoderated, or banned(blacklisted)
- ▶ Banned ones usually contain inappropriate words
- ▶ They can become addictive for those who use them

Gaming Apps

- ▶ Some games include chatboxes like JailBreak, Wild West
- ▶ Gamers often use chat apps like Discord, TeamSpeak3, Skype, Steam Chat to connect
- ▶ Some games, like Call of Duty, also offer Voice chats

Encrypted Emails

- ▶ Encryption prevents unauthorized people from reading messages, by scrambling content

Blogging and Micro-blogging apps

- ▶ A blog is a website where users upload their original entries or share with permission, content on specific or specialized topics. E.g; mashable, Engadget
- ▶ Microblogs are limited in word count or timing and are a more regular affair, shared on social media sites to garner faster attention and response. E.g; Pinterest, Twitter

Professional Networking Apps

- ▶ Help to connect users with other professionals in their field; look for new openings; share knowledge
- ▶ Help users to find support and solutions to their doubts and queries

What Can Go Wrong?

» Misinterpretation of verbal content

Absence of body language

Wrong choice of words

Differences in customs and styles

» Misinterpretation of written content

Impatience

Incorrect writing style

Grammatical errors

Wrong use of caps

» Fake content

» Malinformation targeting government, institutions, specific individuals, or communities to create disturbance

» Defamation

» Cyberbullying and hate-mongering

» Quarrels, trolling, abusing

» Grooming

» Brainwashing

» Scams

Styles of Communication

Who Are You Networking With?

Formal

- » Emails, notes, queries, shared drives

Informal

- » social media apps, gaming sites, chatrooms

Semi-formal

- » Website helpline, Govt websites, app chats, reporting portals
- » Videos, audio recordings

A blue-tinted background image showing a group of business professionals in a meeting. They are gathered around a table, looking at a laptop and a tablet. One person is pointing at the laptop screen. The overall scene is dimly lit, with the primary light source being the screens and the blue overlay.

Efficient and Effective Communication

Good digital communication implies a complete absence of ambiguity, precise content, correct interpretation and response to messages, and responsible use of the digital medium

Steps to Ensure Proper and Safe Communication

- » Keep all your account at max safety limits
- » Passwords should be tough-to-guess and kept private
- » Keep auto updates on to enable vulnerability patching
- » Research and review websites before entering into communication
- » Verify before uploading or sharing sensitive documents (email spoofing)
- » Be mindful of what you say, how you say it, and to whom you say it to

- ▶ Use secured communication channels
- ▶ Avoid clicking on unsolicited links or downloading unsolicited attachments. Bad actors can compromise your account and use it to communicate fake/incendiary content
- ▶ Double-check content clarity, accuracy, summary, and authenticity before sharing or forwarding

**Practice diplomacy: Avoid trolling,
negative or sarcastic posting**
