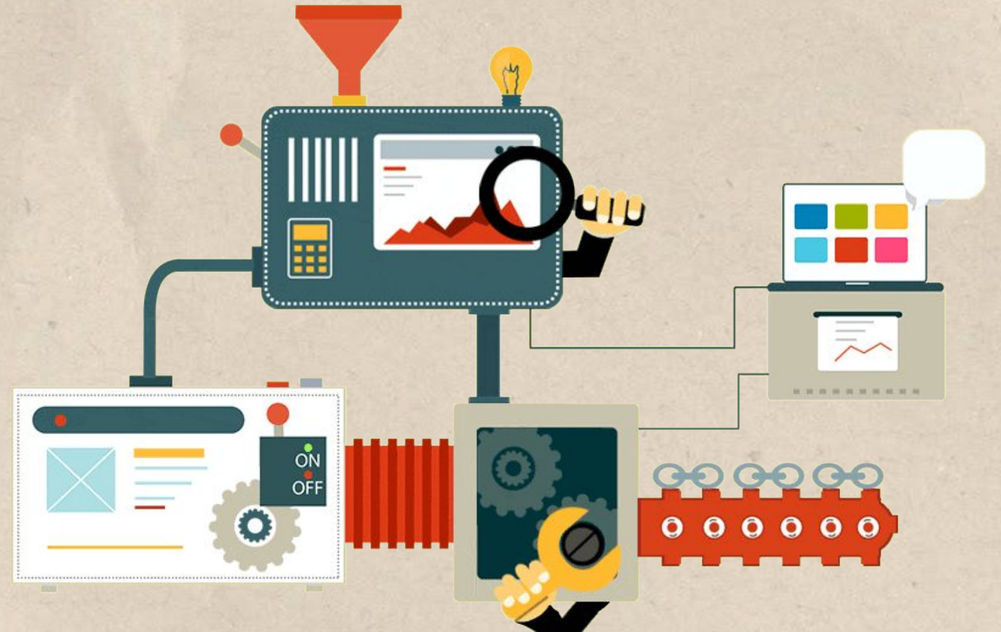
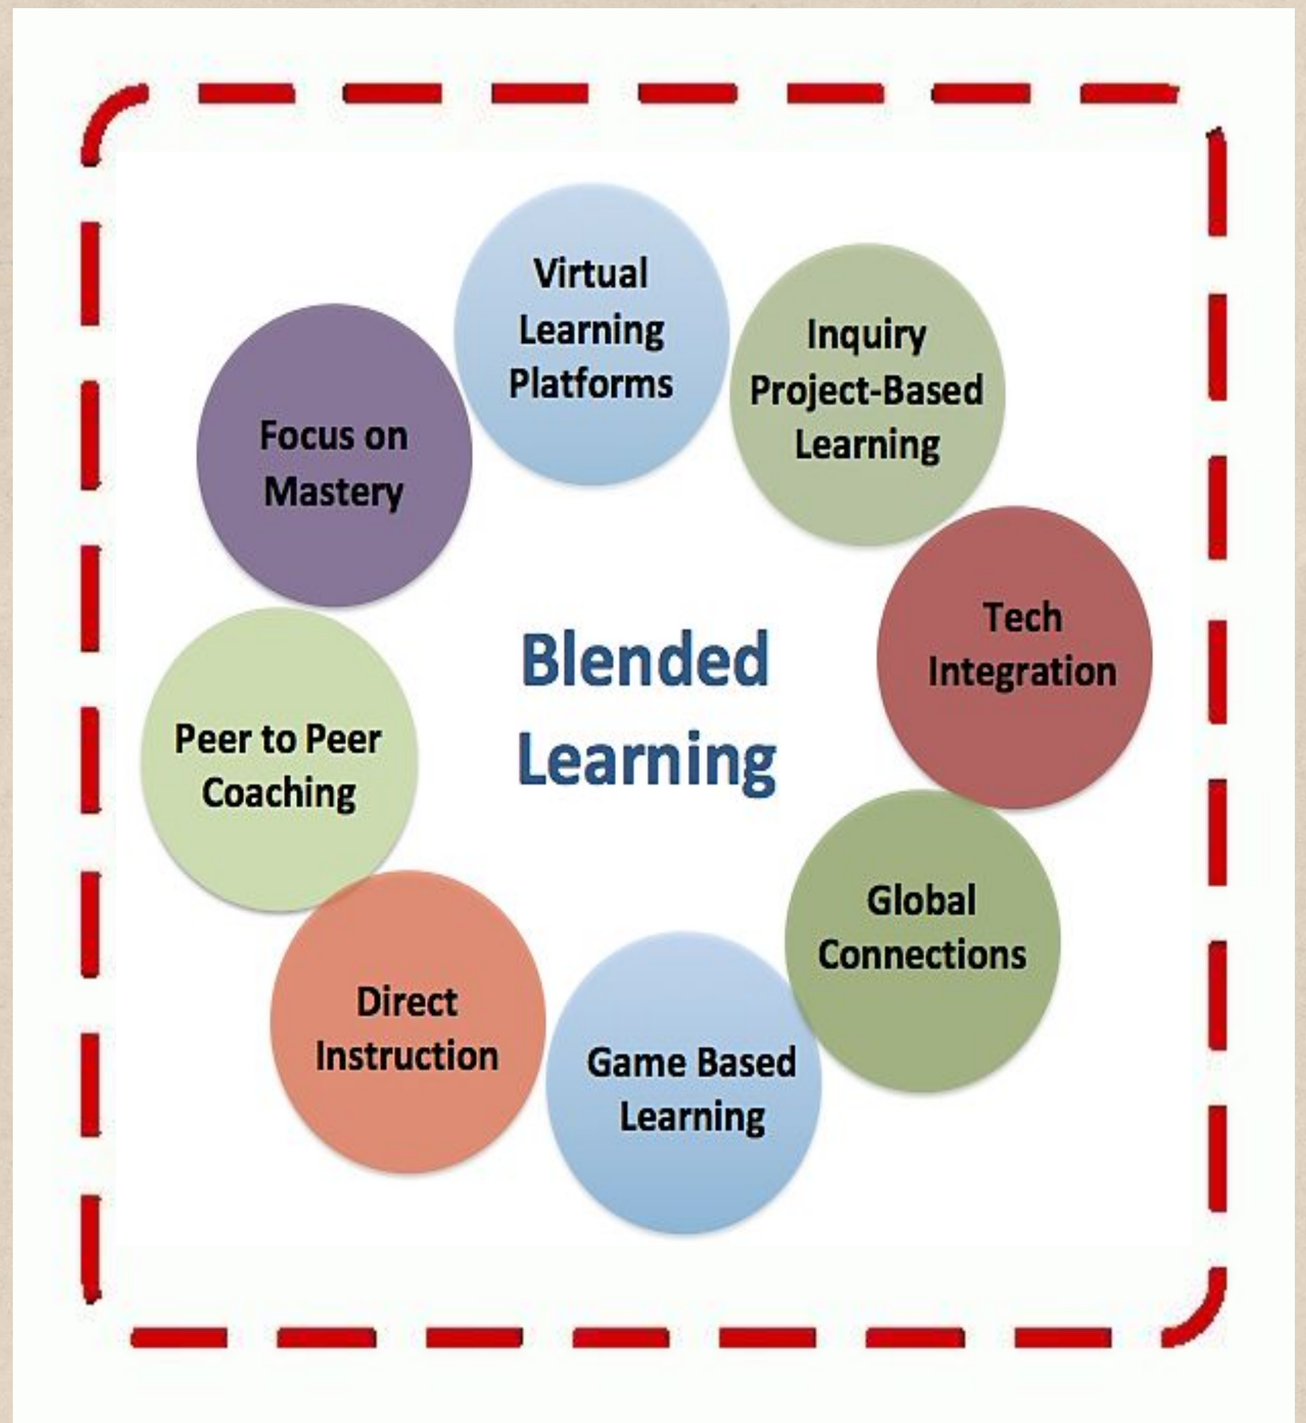
New Education Policy 2020 Recommendation for Assessment

The aim of assessment in the culture of our schooling system will shift from one that is summative and primarily tests rote memorization skills to one that is more regular and formative, is more competency-based, promotes learning and development for our students, and tests higher-order skills, such as analysis, critical thinking, and conceptual clarity. The primary purpose of assessment will indeed be for learning





Blended Learning
Virtual Learning Platforms
Inquiry Project-Based Learning
Tech Integration
Global Connections
Game Based Learning
Direct Instruction
Peer to Peer Coaching
Focus on Mastery

Need of Assessment

- Integrate teaching learning and assessment

Assessment for learning -

Assessment is integral to teaching learning and occurs continuously during teaching-learning process

Assessment as learning

This requires providing opportunities and space to students to critically assess, reflect and analyse their own work during the teaching learning process and identify their strengths and gaps

Assessment for learning

It is used to benchmark students' learning against criteria (Process Skills/ Learning Indicators and Learning Outcomes) based on identified curricular aims and objectives

What are we going to explore in Test Portal Platform
