

Online Courses for School Education

Benefits of online courses

The learner can attend at any time of the day allowing flexibility in schedule.

Flexibility

Online courses are free from the boundations of time and place

Convenience

They are cost effective for all the learners.

Affordability

There are diverse courses available online, giving a choices to the learners.

Content variety

Every individual learner attends the course in their own choice of environment

Personalised education

Policy Perspectives

- The NEP 2020 has a special focus on online education.
- Online tools and platforms like DIKSHA and SWAYAM to be pursued for training content, in-class resources, assessment aids, profiles, etc. that will allow seamless interaction.
- One of the objective is to transform the education system and structure while focusing on online education.
- It emphasizes the role of DIKSHA and SWAYAM as a tech platform for integrating teaching - learning practices.
- Reaffirms the bridging of social gaps, ensuring equitable education for all.

Study Webs of Active–Learning for Young Aspiring Minds (SWAYAM)

**One stop web and mobile based
Interactive e-content platform**

**High quality learning experience using
multimedia on anytime, anywhere
basis**

Access, equity and quality

**State of the art system that
allows easy access,
monitoring and certification**

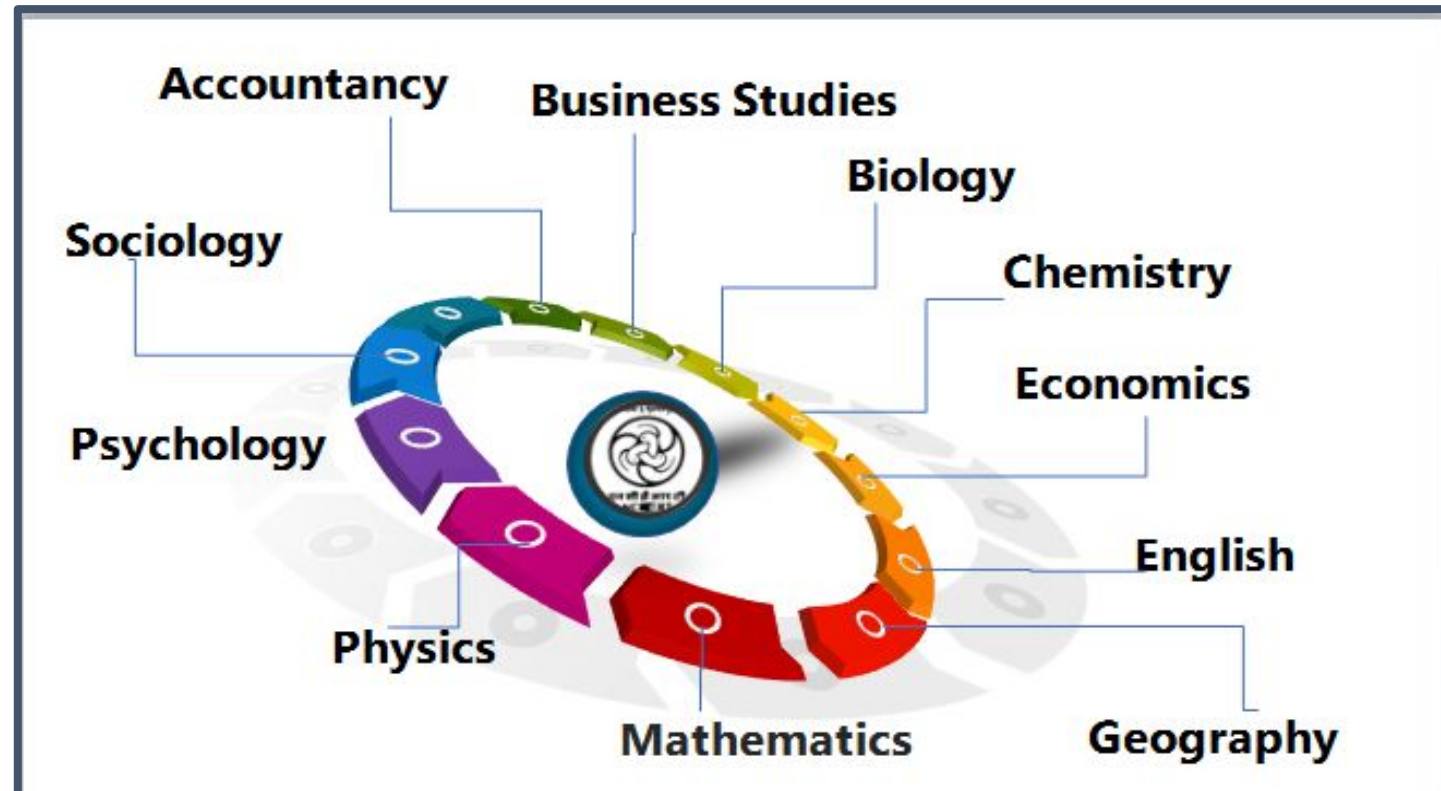

**Hybrid model of delivery that
adds to the quality of classroom
teaching**

National Coordinators on SWAYAM

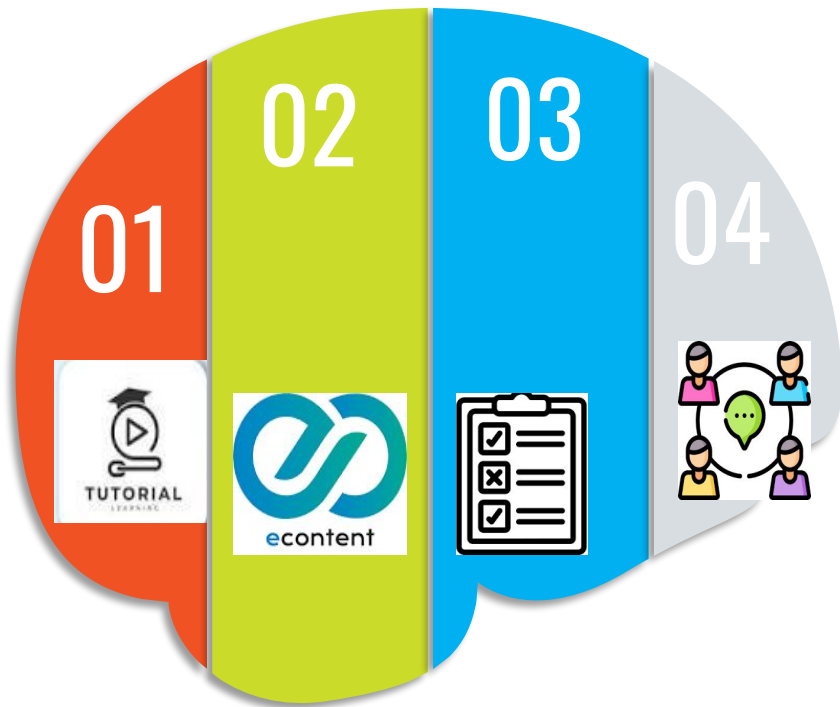

Online Courses offered by NCERT on SWAYAM

- 28 courses for Class XI and XII across 11 subjects
- Yearly two cycle:
 - April to September
 - October to March
- Who can join?
 - Students
 - Teachers
 - Parents
 - Any one

Components of Course

01

eTutorial (Video)

02

eContent (PDF, Text, e-Books, Illustrations and Documents) including Web resources (Related Links, Wikipedia, Open Content etc.).

03

Assessment (Problem/ solutions, MCQs, Short answers type, Quizzes, Assignments etc.).

04

Discussion forum

Live session on TV channel, Live interaction with mentors, Final assessment

How to join and complete the course

1. Access the course links from CIET site :
<https://ciet.nic.in/swayam-moocs.php?&ln=en>
2. Access the Course by clicking on the course link
3. Register on <https://swayam.gov.in/>
4. Join the selected course for **FREE**
5. Learn the content and complete all activities
6. Take up the final assessment and get certified

Step 1: Access the course links from CIET site

The screenshot displays the CIET website's navigation menu and a list of resources. The top navigation bar includes links for Home, About Us, Constituents, Projects, Resources, Events, Transmission, Announcements, SIETs, RTI, People, and Contact Us. The Resources menu is expanded, listing various educational materials. On the left, a banner features the motto 'वसुधैव कुटुम्बकम्' and the 'ONE EARTH, ONE FAMILY, ONE FUTURE' theme. Below this, an 'About CIET....' section provides a brief description of the institute's mission. On the right, a row of international flags is visible, and a 'DOWNLOADS' button is shown next to an illustration of a hand holding a smartphone.

Assignment for Chapter 2

Assignment 1

Due on 2023-09-24, 23:59 IST
Maximum size of assignment : 5 MB

Make a table consisting of a comparison of key indicators like mortality rate, infant mortality rate, life expectancy, literacy rate, female literacy rate and share of agriculture in employment and GDP at the time of independence and their current values. Express the contrast in a few words, throwing light on the factors that caused this change.

Rizwan Fatma 11:37 (1 hour ago)

Is there any difference between apomixis and parthenocarp? What the their benifits?

diksha course 11:42 (1 hour ago)

to Discussion forum for Biology XII Part-I, Rizwan Fatma

Yes, **parthenocarp** is different from apomixis. In parthenocarp, the fruit is produced without the fertilization of the female gamete. It is used for the production of fruits without seeds such as banana and grapes for commercial purposes. Apomixis is the process in which the seeds are produced without fertilization but the process occurs in the female reproductive tract of the plant. In this, the megaspore mother cell does not undergo meiosis. It is used for the commercial production of hybrid varieties and in the production of virus-free varieties.
