Integrations

Moodle

Canvas

Blackboard

Brightspace

Microsoft Teams

PowerPoint

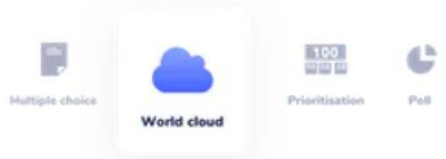
Google Slides

Keynote

- Download Wooclap add in
- Add on Wooclap and insert your questions there
- Add Online Audio/Video or files into your presentation and questionnaires

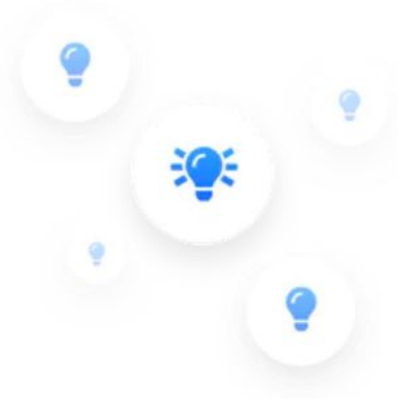
Features

- Word cloud
- Quiz
- Live poll
- Live messaging
- Asynchronous learning
- Reports



The Word Cloud

Impress your audience with a dynamic word cloud, in which answers appear in real time according to their recurrence.



The Open Question

Allow your participants to answer your question freely. This type of question can be prepared in advance, or added during your presentation, if you want to question your audience spontaneously!

The Find a Number

You have the option of asking your audience to answer a question using a numerical value. The average, minimum and maximum of their answers will be displayed on your screen.

View your audience's answers

Check the **event report** to go through your audience's answers, question by question, once the event is over. Would you prefer to view each answer each participant has given? You can do so in the **grid of results**.

Export results

You can find the results of one or more events in an **Excel or PDF file** to analyse them. In that file, you'll also find a tab containing the messages participants sent during the event(s).

Thanks!
