

Course Presentation

Salient Features of H5P

- H5P content is editable in web browsers,
- Course Presentation activity type includes a WYSIWYG drag and drop based authoring tool.
- Course presentations contain slides where you can add various multimedia- and interactive elements to engage the learner.

Step 1: Open Lumi Desktop (<https://app.lumi.education/>)

app.lumi.education

Community HSP Cloud Hub Login Register

Make education accessible, individual and exciting.

Create interactive and engaging content. Discover content from other creators or share your own content. Make your content available for your learners.

Step 2: Select the relevant operating system

The screenshot shows a web browser window with the URL 'on/#download'. The page features a teal header with navigation links for 'Community', 'H5P', and 'Cloud Hub', along with a 'Login' button. The main content area has a blue background and includes the text 'DONT WANT TO WORK ONLINE?' and 'Lumi Desktop'. Below this, it states 'Lumi Desktop runs as a desktop program on your computer.' At the bottom, there are three buttons for selecting an operating system: 'Windows', 'MacOS', and 'Linux'. Each button is highlighted with a red arrow pointing upwards.

Step 4: Open H5P Editor

The screenshot shows the Lumi application interface. At the top, there is a teal header bar with the Lumi logo and a settings gear icon. Below the header, there are two main cards. The left card is titled "H5P Editor" and features the H5P logo. The right card is titled "Lumi Analytics" and features a line graph icon. A large orange arrow points to the "H5P Editor" card.

H5P Editor
Lumi's H5P Editor is a standalone application that lets you view, edit and create H5P.

Step 5: Create New H5P

Step 6: Open Course Presentation

The screenshot shows the Lumi application interface. At the top, there is a teal header with a back arrow, the text 'Lumi', and a settings gear icon. Below the header is a navigation bar with a 'VIEW' button and an 'EDIT' button. On the left side, there is a sidebar with a 'new H5P' button and two options: 'Open H5P File' and 'New H5P file'. The main content area displays a dialog box titled 'H5P Hub Select content type'. Inside the dialog, there is a 'Create Content' button and a 'Paste' button. Below these is a search bar labeled 'Search for Content Types'. Underneath the search bar, there is a section titled 'All Content Types' with sorting options: 'Show: Popular First', 'Newest First', and 'A to Z'. The 'Popular First' option is selected. Three content types are listed: 'Interactive Video', 'Course Presentation', and 'Multiple Choice'. Each content type has a 'Get' button with a downward arrow. A large red arrow points to the 'Get' button for 'Course Presentation'.

Step 7: Install Course Presentation

Step 8: Use Course Presentation

The screenshot shows the Lumi application interface. At the top, there is a menu bar with 'Lumi', 'File', 'Edit', and 'Help'. Below this is a teal header with a back arrow and the word 'Lumi', and a blue header with a settings gear icon. On the left side, there is a sidebar with a 'new H5P' button and two options: 'Open H5P File' and 'New H5P file'. The main content area is titled 'Course Presentation' and includes a sub-header 'H5P Group'. Below the title is a paragraph of text: 'Course presentations consist of slides with multimedia, text, and many different types of interactions like interactive summaries, multiple choice questions and interactive videos. Learners can experience new interactive learning material and test their knowledge and memory in Course ... [Read more](#)'. A 'Content Demo' button is located below the text. At the bottom of the main content area, there is a row of five slide thumbnails, each with a navigation arrow. A large red arrow points to a blue 'Use' button located at the bottom right of the interface. Below the 'Use' button is a 'License' section with a right-pointing arrow.

Step 9: Creating a Course presentation

Course Presentation Tools

1. Text	9. Fill in the blanks	17. Mark the words
2. Link	10. Single Choice Set	18. Dialog Cards
3. Image	11. Multiple Choice	19. Continuous Text
4. Shapes	12. True & False	20. Expandable Text Area
5. Video	13. Drag and Drop	21. Table
6. Go to slide	14. Summary	22. Interactive Video
7. Audio	15. Drag the Words	23. Twitter User Feed
8. Audio Recorder	16. Image Choice	

Step 10: Adding a slide

We'll start by adding a slide in the slides panel to the left. The slide titles can be used to navigate between the slides.

Press the  button (bottom left) to open the "Slides" menu. Press the pen next to "No title"  to add a slide title. Now we can move on to adding some images.

Step 11: Adding content

We add the pictures by using the  button in the top toolbar. Press this button, drag it to where you want the image to be placed and drop it there. A dialog will automatically open.

Press the  button, browse to where you saved the picture and select it for upload.

Edit Image

Metadata

Note: To avoid abuse, H5P.org has limited file size on uploads to 16 MB. To use larger images you must install H5P on your web site.

Add

Alternative text *

Required. If the browser can't load the image this text will be displayed instead. Also used by "text-to-speech" readers.

Hover text

Optional. This text is displayed when the users hover their pointing device over the image.

Comments

The comments are shown when the user displays the suggested answers for all slides.

Always display comments

Six regularly used licenses

1. Attribution [CC BY] : This license lets others *distribute, remix, adapt, and build upon your work, even commercially, as long as they credit you for the original creation*. This is the most accommodating of licenses offered. Recommended for maximum dissemination and use of licensed materials.

2. Attribution-ShareAlike [CC BY-SA] : This license lets others *remix, adapt, and build upon your work even for commercial purposes, as long as they credit you* and license their new creations under the identical terms. *This license is often compared to “copyleft” free and open source software licenses.* All new works based on yours will carry the same license, so any derivatives will also allow commercial use. This is the license used by Wikipedia, and is recommended for materials that would benefit from incorporating content from Wikipedia and similarly licensed projects.

3. Attribution-NoDerivs [CC BY-ND] : This license lets others reuse the work for any purpose, including commercially; however, it cannot be shared with others in adapted form, and credit must be provided to you.

4. Attribution-NonCommercial [CC BY-NC]: This license lets others *remix, adapt, and build upon your work non-commercially*, and although their new works must also acknowledge you and be non-commercial, they don't have to license their derivative works on the same terms.

5. Attribution-NonCommercial-ShareAlike [CC BY-NC-SA]:

This license lets others *remix, adapt, and build upon your work non-commercially*, as long as they credit you and license their new creations under the identical terms.

6. Attribution-NonCommercial-NoDerivs [CC BY-NC-ND] :

This license is the **most restrictive** of our six main licenses, only allowing others to download your works and share them with others as long as they credit you, but they can't change them in any way or use them commercially.
