Duties

In addition to my normal duties as a teacher in GGHSS Kangan I am also working as:-

- 1. District Nodal officer ICT District Ganderbal**
- 2. DNP Coding Classes District Ganderbal**
- 3. DNO Cyber Safety District Ganderbal .**
- 4. Member Jammu and Kashmir Knowledge Network Kashmir Division.**
- 5. Master Trainer NCERT, New Delhi, SCERT J&K and DIET Ganderbal.**
- 6. Member Team DIKSHA DIET Ganderbal.**

Childhood

- **Challenges as a child.**
- **Below average student.**
- **Transformation in a new school.**
- **Overcoming academic difficulties.**

Growing-up

- **Focus on personal growth and self-improvement.**
- **Development of leadership skills.**

Higher Education

- **Got Higher education in the field of IT.**
- **Students organizations.**

Experiences

- **FCSA JNV Ganderbal.**
- **Contractual Lecturer Department of Education.**
- **MIS Operator.**
- **Department of Education.**

Establishment of ICT/Smart class Lab 2016

Importance of Trainings

Challenges

- **As member of J&K Knowledge newtwork.**
- **Teachers trainings.**
- **Not fully aware about ICT in education**
- **No e-content was available in our local languages**
- **Teacher motivation is still a big challenge.**

We came forward voluntarily and started our work with the consent of higher authorities since from that day we are working day and night to implement the project at gross root level.

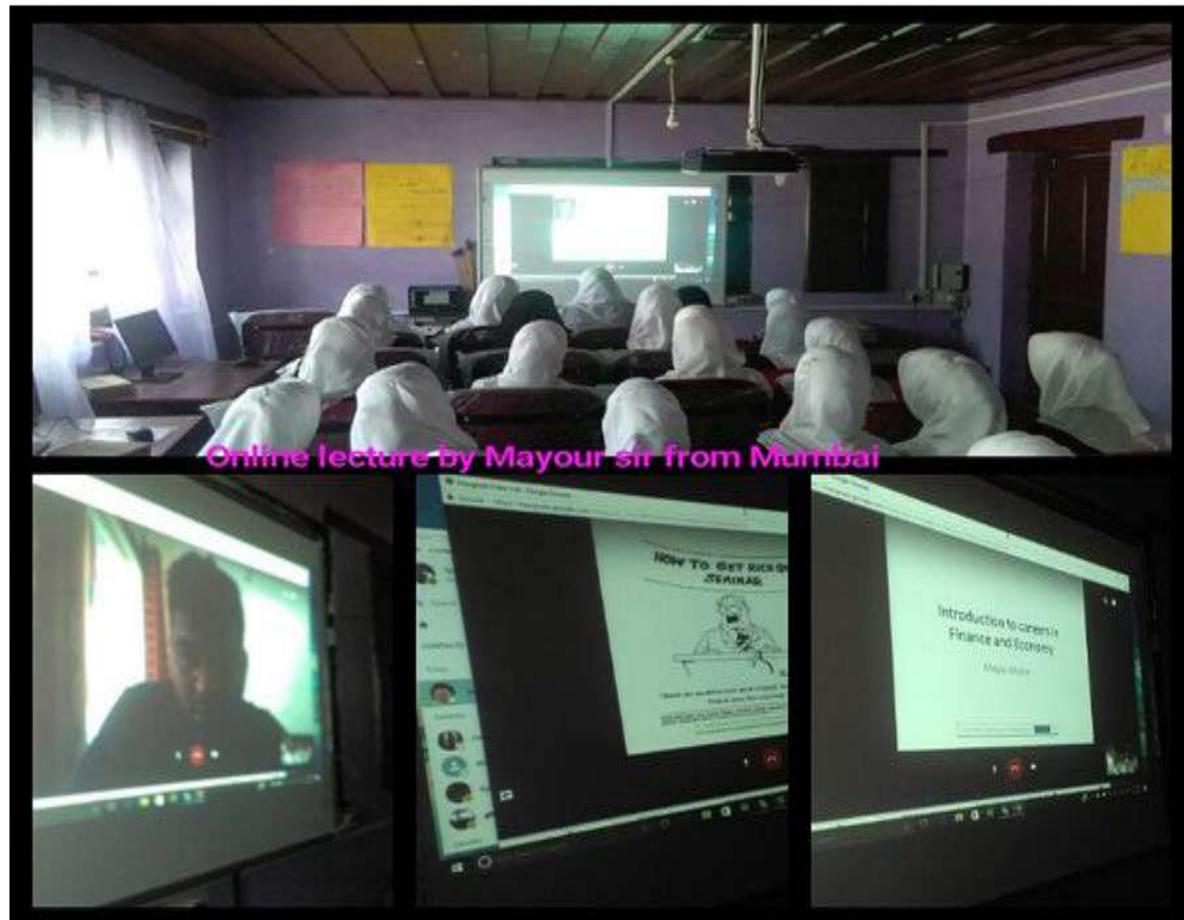

Jammu and Kashmir Knowledge Network

- **Jammu and Kashmir Knowledge Network (JKKN) is an initiative to connect school children of J&K to a world of knowledge through the ICT.**
- **Conducting ICT activities in J&K in an organized manner.**

Today on 17/04/2018 JKKN organised an interactive session with **"Mr. Irfan Shahmini", Founder, CHINAR International** on the Topic **"Youth-led Social Change"**. The session was attended by students from various schools across J&K

Irfan highlighted the importance of seeing the social sector also as a career option whereby one can make a career of creating large-scale, sustainable, social change. He said the emergence of the social sector was because of failure of the government and private sectors in tackling society's issues. He also explained the role CHINAR International is playing in working towards empowering orphans, youth and marginalised children through quality education and other socioeconomic interventions. He encouraged the youth who participated to start understanding problems they face and to start working towards their solutions. He said a mindset had developed among people that solving societal problems is someone else's responsibility and we constantly keep shifting the blame.

During the Q&A sessions, children asked a variety of questions such as what is it that they could do at the moment to help society. Some students also talked about the problems of Girls in the society. A teacher commented that rising extremism of ideology has

Online discussion with international Students

Generation Global an international organization organizing different innovative programs for the students I got the opportunity to learn many innovative ideas from this organization . Our students face the problems of shyness, lack of exposure, weak communication skills, weak English, Behavioral problems, weak critical thinking and problem of narrow mindedness I involved my students in online discussion programs with the students of other states of our country and especially with the students of other countries like Ukraine, Indoasia, Egypt, Italy Pakistan, Philippines, and Jordan etc. My school is first school from Kashmir who participated in online discussion programs of Generation Global A London based international organization conducting VCs to improve the dialogue skills among the students around the world. Conducted huge number of VCs from JK during the years of 2020-21, 2019-20,2018-19. The generation global programs proved very fruitful for open mindedness ,communication skills, critical thinking behavioral change etc of the students are concerned. The online discussion programs will help the students to know about different cultures ,regions and religions. The discussions will improve their critical thinking as the students will ask number of questions to each other to know deeper about their communities and will try to clear the misconceptions.

Coding Programme for students

We are presently running three types of coding classes

- 1. Scratch.mit for the students who have Computers.**
- 2. Codemitra for the students who are having smart phones.**
- 3. Pro-Game for the students who don't have smart phones /computers.**

Coding Video

Benefits of Coding

- **Logical Thinking.**
- **Problem solving skills.**
- **Students learn to think critically and to solve problems.**
- **Students apply classroom knowledge to create projects.**
- **Getting ready for future which belongs to Robotics and Artificial Intelligence.**

Weekly Coding Classes

Computer Programming or Coding involves the process where you give instructions to Computers with the help of Programming languages that the machines understand. The Computer programme is a sequence of instructions that can range from a two-line code to something that can run millions of lines. The Computer programs are used for specifying individual tasks to the computer. There are various software programs and applications that we interact with on a daily basis. The Computer program is the foundation of these technologies and forms the core of the digital world.

Implementation of joyful Continuous and comprehensive evaluation

I am using Kahoot in my classroom from last two years I trained hundreds of other teachers in J&K through the platform of J&K Knowledge network. Kahoot is a game-based learning platform, used as educational technology in schools. Its learning games, "Kahoots", are user-generated multiple-choice quizzes that can be accessed via a web browser or the Kahoot app. Kahoot can be used to review students' knowledge, for formative assessment, or as a break from traditional classroom activities. Kahoot is very simple to use tool for assessment before this assessment was very time consuming for me but Kahoot made assessment very joyful, easy and time saving that is why I trained 100's of other teachers to use it. Review students knowledge and conduct formative assessment using Kahoot Kahoot is a game-based learning platform used as educational technology in schools Its learning games "kahoots" are user-generated multiple-choice quizzes that can be accessed via a web browser or the Kahoot app Computer with Projector for teachers students can participate using smartphones of staff members and Computers available in Computer Lab of the school. We can play Kahoot with only smartphones and Videoconferencing apps by splitting the screen using screen split App I was using this technique during COVID Lockdown my students participated using Zoom and screen split and it proved very beneficial.

Using Kahoot in my classroom offline and online

Empowered Every Voice in my classroom using FlipGrid

Our classes have time limitations and high roll due to which we can't provide opportunity to all the students to deliver presentations, participate in discussion on a topic etc in our classroom so in order to solve this issue i used flipgrid in my classroom so that all the students can get the opportunity to deliver presentations, talk on different topics , discuss on a particular topic etc Flipgrid facilitate video discussions. Each grid is like a message board where i as teacher pose questions topics and my students can post video responses that appear in a tiled grid display all the students can respond at a time, anytime, anywhere. With this even shy and below average students can upload their colourful video comments on the topics and participate in discussion on different topics. I found it very useful in implementation of constructivist approach of learning, improvement in critical thinking, communication skills, inclusive education etc I trained hundreds of teachers to use Flipgrid in teaching learning process so that they can include all the students actively in different activities. Recently I Conducted district level programs on different topics like Woman's rights, environmental issues etc in which students from different government schools participated actively.

Advantages of using FlipGrid

Our classes have time limitations and high roll due to which we can't provide opportunity to all the students to deliver presentations, participate in discussion programs on different topics etc using Flipgrid all the Students can participate anytime anywhere. Some students feel shy to speak before teachers and other students with the help of Flipgrid such students can record their responses anywhere they feel comfortable. In Flipgrid students can create very attractive colourful videos including text ,images etc very easily .The students will enjoy this activity and they don't need to create any account on Flipgrid hence no issue of cyber security issues. They just need a code to participate.

Topic: - Save Water Save Life-

Participants :- Students from all the Schools.

Students from each school will share two colourful videos through the FlipGrid link provided to them by ICT Wing CEO Ganderbal.

First Video :- While saving a water body (30 Second Video) renovation, cleaning of a water body, public awareness door to door etc.

Second Video:- Students will speak on the topic "Save Water Save Life"

Students can talk about:-

- Importance of Water.
- One suggestion to save water etc.

Note :- This program is in addition to other programs scheduled by the School.
