Digital Storytelling: Video Resources

Dr. Monica Nagpal

Digital Storytelling

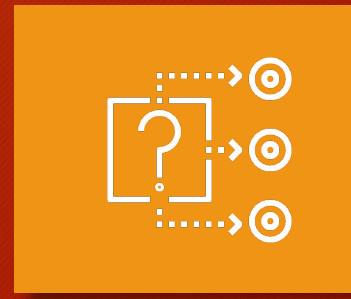
- A digital story is a multimedia presentation combining a variety of digital elements within a narrative structure (a story). Media may include text, images, video, audio, social media elements (e.g. Tweets) and interactive elements (e.g. digital maps).

- “…digital storytelling combines the best of two worlds: the "new world" of digitised video, photography and art, and the "old world" of telling stories.” *Dana Atchley, Digital Storytelling pioneer*

Video Resources

- Educational videos as a tool for learning everything
- Abstract topics that once seemed difficult to teach and learn are now more accessible and understandable
- Video is a powerful medium, but it must be created with an eye for strong pedagogical choices in order to be most effective.
- Like, just as video is one tool in the media toolbox, lecture is one strategy on the instructional palette.
- The use of videos in teaching and learning serves to not only benefit students, but also teachers, their affiliated institutions

Purpose



Video resources shall be designed for presenting case studies, interviews, digital storytelling, student directed projects, and more. Choosing the appropriate instructional strategy and pairing it with an effective media format is part of the analysis performed during your course design process.

Formats of Audio & Video Programmes

- **Documentary-** This format needs documentation. No fiction, imagination and speculation is allowed in this format but only the facts which are duly authenticated by research and factual elements.
- **Drama-** message is communicated through drama in this format. This format requires creative writing. Facts are presented through an anchor followed by drama.
- **Docudrama-** Here there is no compromise with the fact but mode of presentation is speculative.
- **Talk-** Talk format is the simplest but most popular format of all times. In this format, experts on different topics are invited are asked to deliver a talk. It can also be named as lecture format.

Formats of Audio & Video Programmes

- **Interview-** Experts are invited in this format and an interviewer asks questions from them. Questions can either be framed earlier to interview with consultation of the expert or it can be asked ex tempore.

- **Feature-** Feature is a format where some particular attribute is specifically focused in a program. It covers only one feature or specialty of an aspect.
- **Magazine-** When various kinds of contents are covered altogether.

- **Vox populi-** Vox populi is a french word which means- Voice of the people. It is open forum where people express their opinion. Mostly these programs are recorded outside the studios.
