

The "AI-Tutor" Hybrid Learning Mode

Presented by:

Dr. Naveen Gupta
National ICT Awardee

Unlock Your Superpowers: The AI Tutor Hybrid Model

How to use AI & Human Mentorship to Study Smarter, Not Harder

February 3, 2026

Presenter: Naveen Gupta

Why We Need a New Way to Learn

The "Study Struggle" is Real

The 3 AM Panic

Stuck on a problem the night before an exam with no one to ask.

The "One Pace" Problem

The teacher moves too fast (or too slow) for you.

The Fear of "Dumb Questions"

Avoiding raising your hand in class because you don't want to look confused.

The Input Overload

Too many PDFs, too many notes, and not enough time to synthesize them.

You + AI + Teacher = The Dream Team

What is the Hybrid Model? (For Students)

Definition: It's not about AI replacing your teacher. It's about using AI for the "heavy lifting" so you can use your teacher for the "heavy thinking."

The Workflow:

AI (The Drill Sergeant)

Helps you memorize facts, summarize readings, and practice basics 24/7.

Teacher (The Expert Coach)

Helps you understand *why* it matters, guides complex projects, and mentors you.

You (The Pilot)

You control the tools to drive your own learning.

Tool 1: Google NotebookLM (The Ultimate Note-Taker)

Tool Spotlight - The "Study Buddy"

Why it's a game-changer: It turns your boring PDFs into an engaging podcast.

How it works (The Explanation):

- **Source Grounding:** Unlike ChatGPT, which uses the whole internet (and can lie), NotebookLM *only* looks at the documents you upload (your textbook, class notes, slides). It creates answers based *only* on your class material.
- **Audio Overviews:** You can upload your biology notes and click "Generate Audio." It creates a conversational podcast of two AI hosts discussing your notes. Perfect for listening while walking to class!
- **Citation:** Every answer it gives includes a citation number. Click it, and it highlights exactly where in your PDF that info came from.

Student Use Case: "I have a 50-page history reading. I upload it to NotebookLM, listen to the podcast summary on the bus, and then use the chat to quiz me on the key dates."

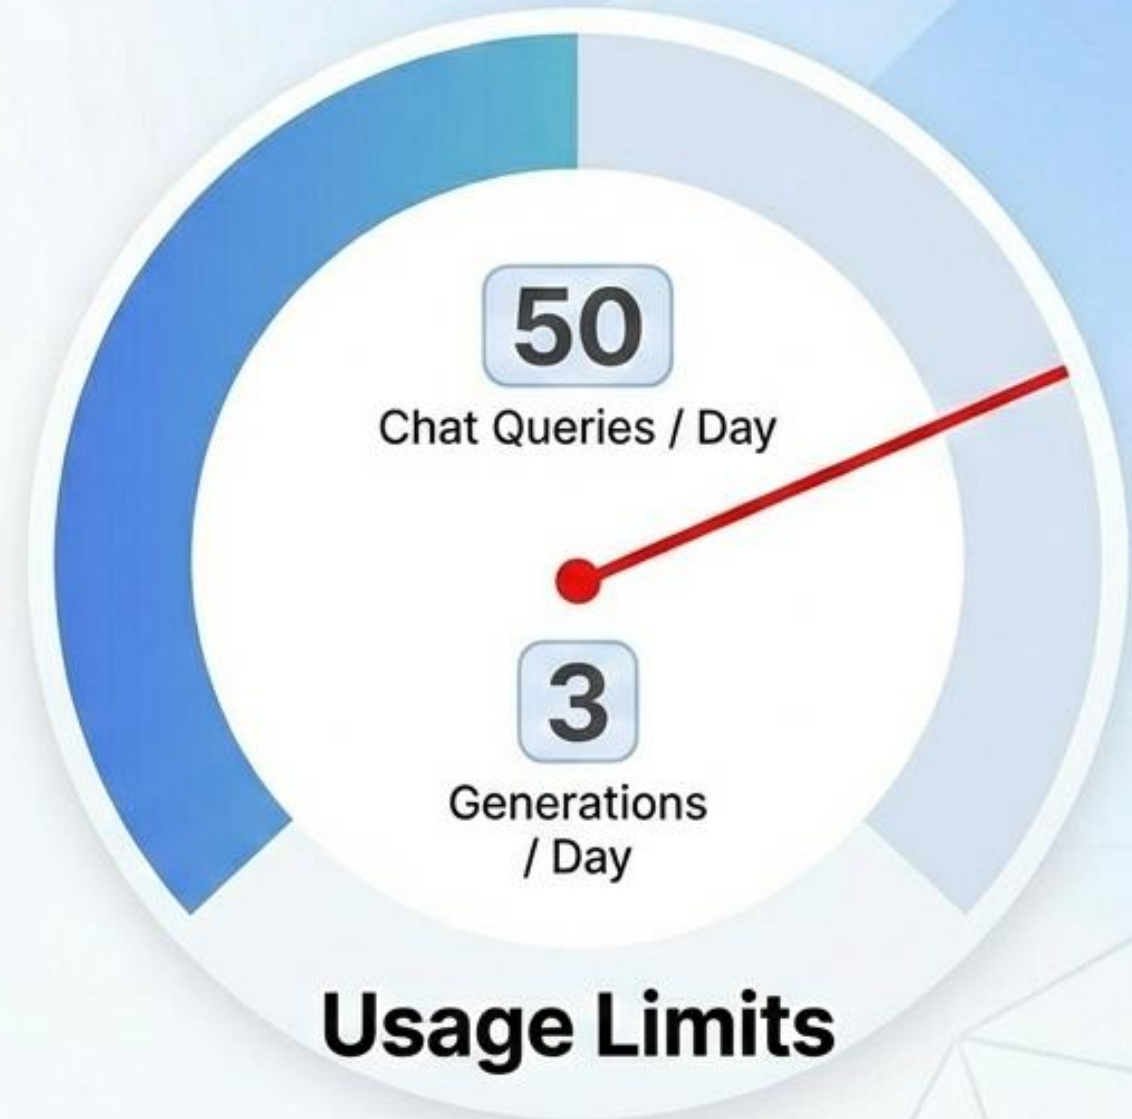

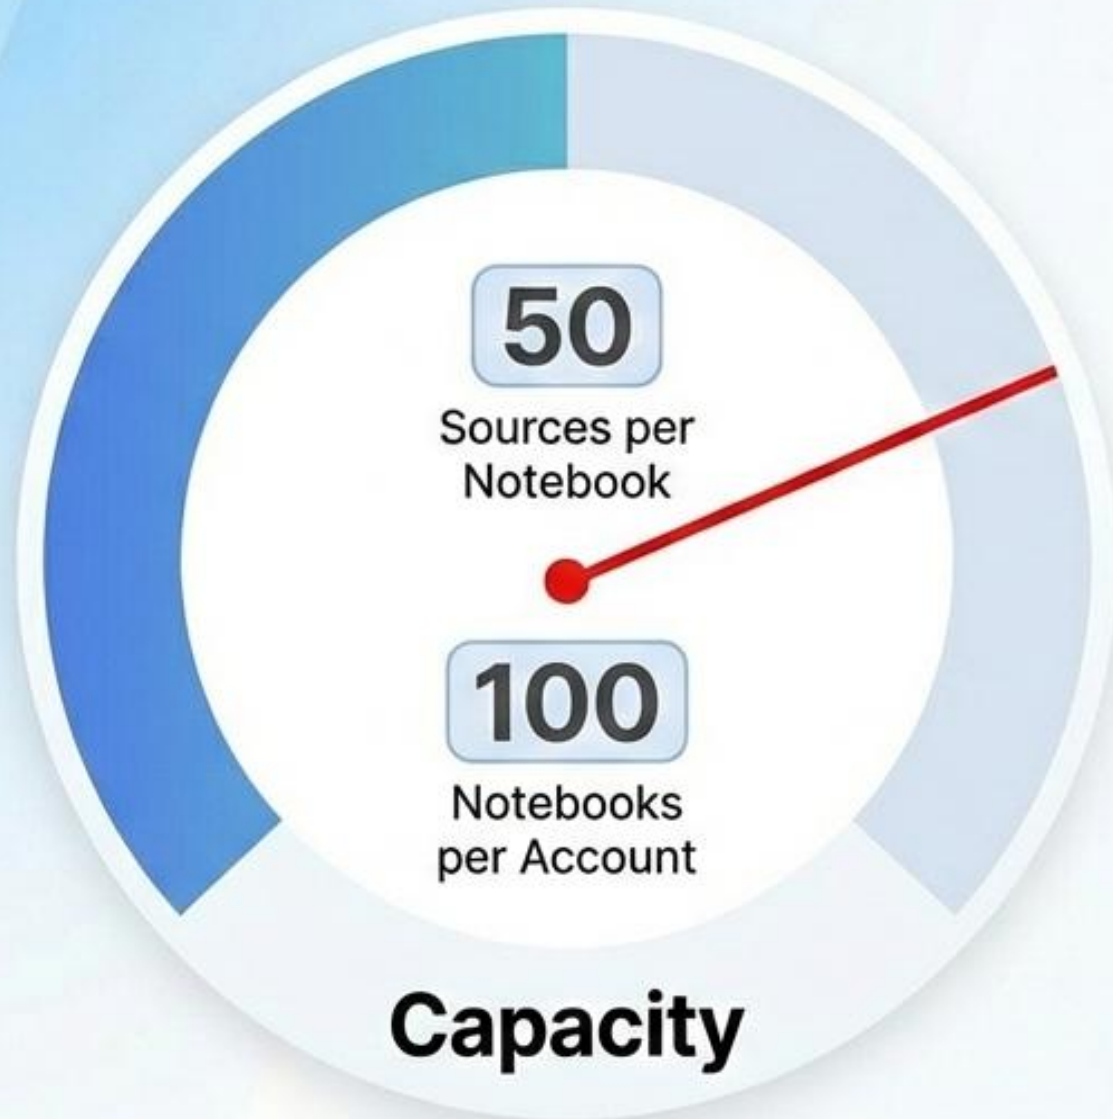

NotebookLM: AI-Powered Research & Content Tool

Analyze Documents, Generate Insights, and Create Content

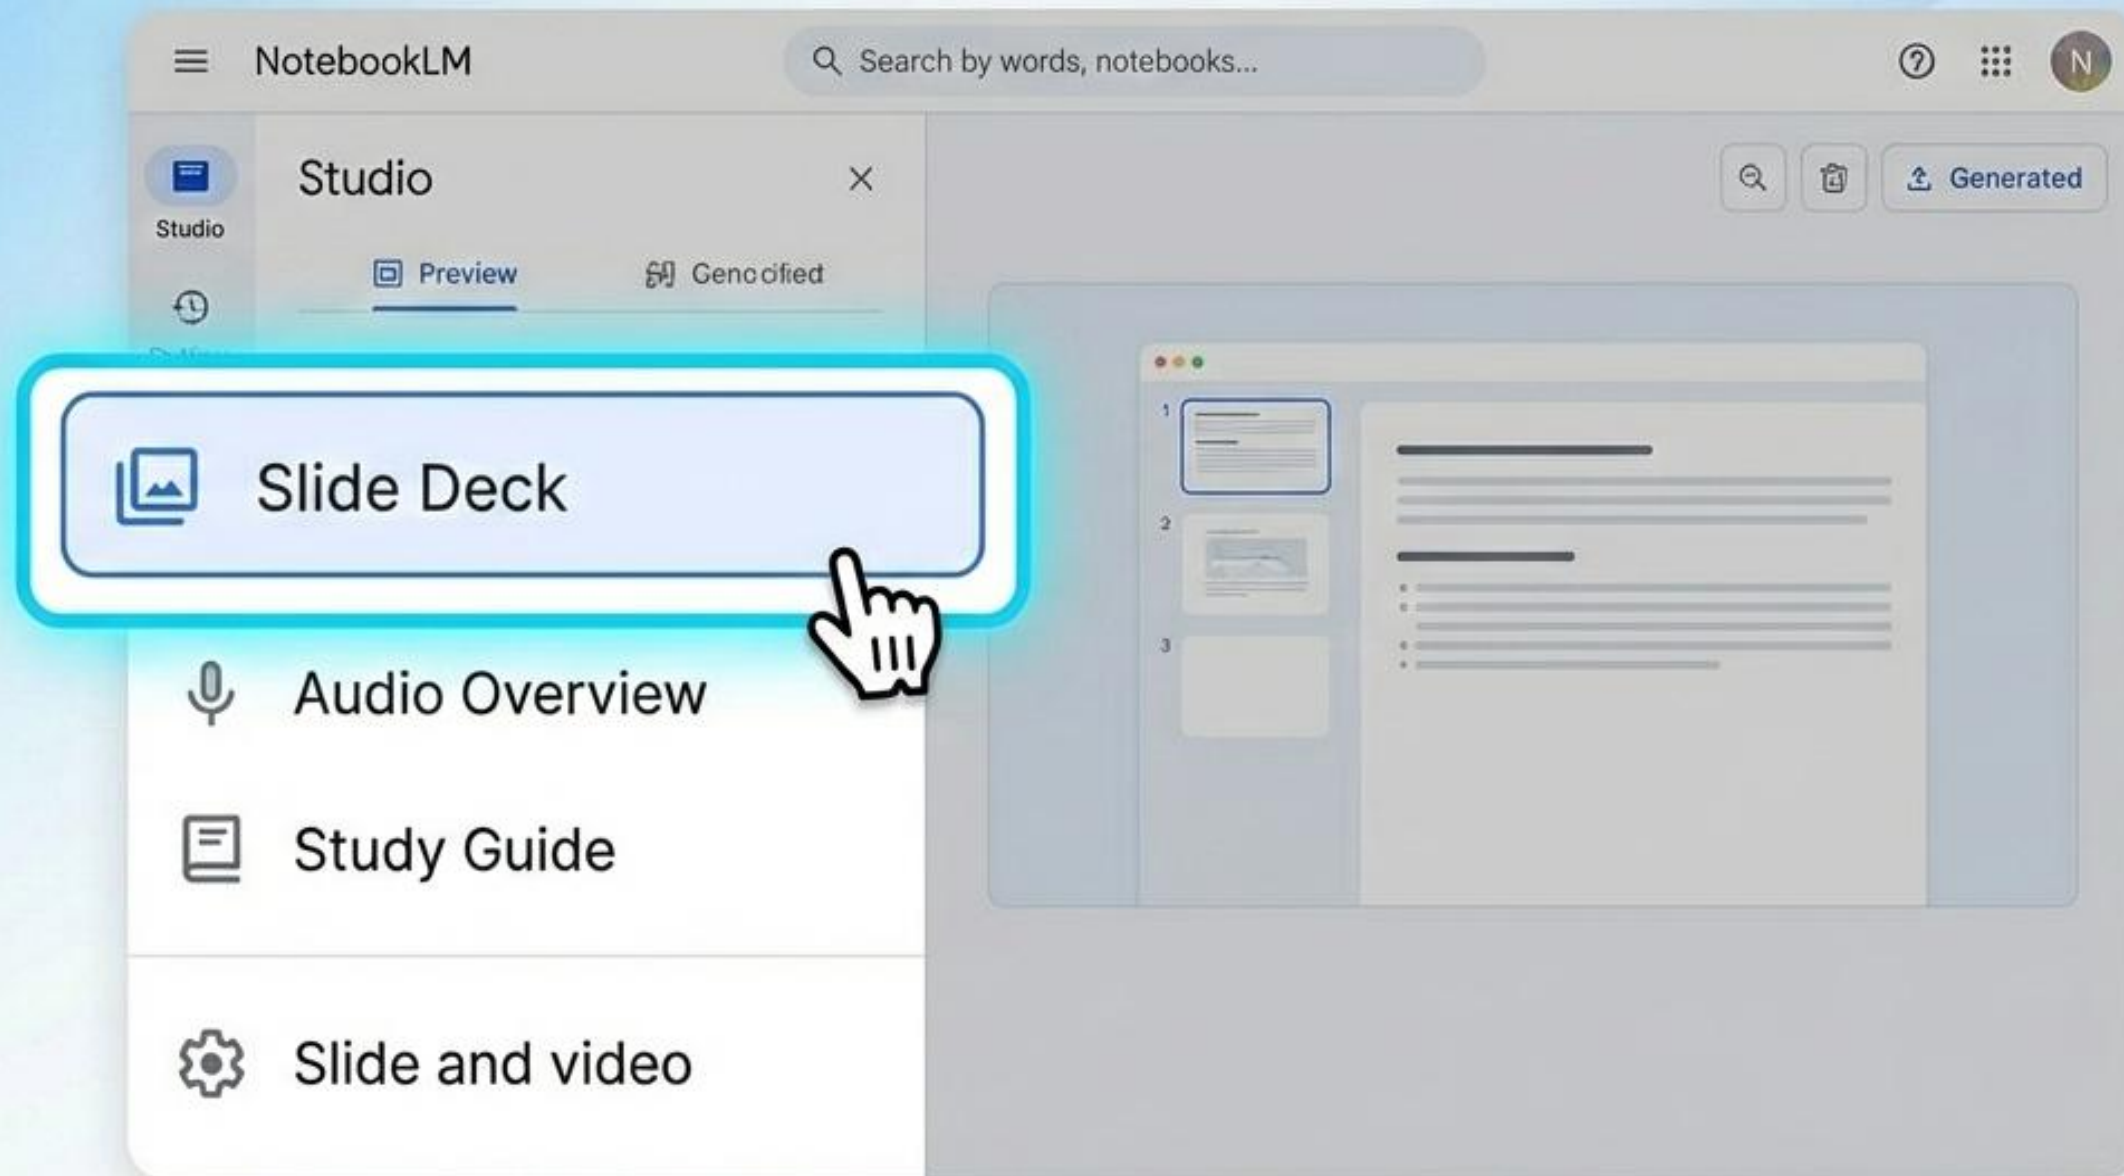

Key Features: Multimodal Input

Limitations of the Free Version

How to Generate Presentations

Tool 2: Khanmigo / ChatGPT (The Personal Tutor)

Tool Spotlight - The "Socratic Tutor"

Why it's a game-changer: It doesn't give you the answer; it helps you find it.

How it works:

- **The Socratic Method:** Instead of asking "What is the answer to #5?", you ask "I'm stuck on this step of the equation."
- **The Prompt:** *"Act as a strict but helpful math tutor. Do not give me the answer. Look at my work below and tell me which step I got wrong, then give me a hint to fix it."*

Student Use Case

Debugging code, fixing grammar in essays (without rewriting them for you), and practicing language conversation skills.

A Day in the Life of a Hybrid Learner

The "Hybrid" Workflow in Action

Morning

Listen to **NotebookLM** Audio
Overview of today's lecture notes
during commute.

1

In Class

Focus on the teacher's deeper
explanation and ask complex questions
(since you already know the basics
from the AI).

2

Evening

Use **ChatGPT** to generate practice
quizzes for the upcoming test.

3

4

Late Night

Use **Grammarly/AI** to proofread
your draft, then submit it.

Don't Cheat Yourself out of a Brain

The "Danger Zone" (Ethics & Pitfalls)

The "Illusion of Competence"

Reading an AI answer makes you *feel* like you know it. You don't know it until you can do it without the AI.

Hallucinations

AI can be confidently wrong. Always verify facts (this is why NotebookLM is great—it cites sources).

The Copy/Paste Trap

If you copy-paste an essay, you skip the critical thinking process. You will fail the in-person exam. Use AI to *brainstorm*, not to *write*.

Let's Try It Live!

Interactive Demo (Live on Webinar)

Presenter Note: Share screen. Open NotebookLM.

01

Step 1

Upload a sample "Chapter 1: Intro to Macroeconomics" PDF.

02

Step 2

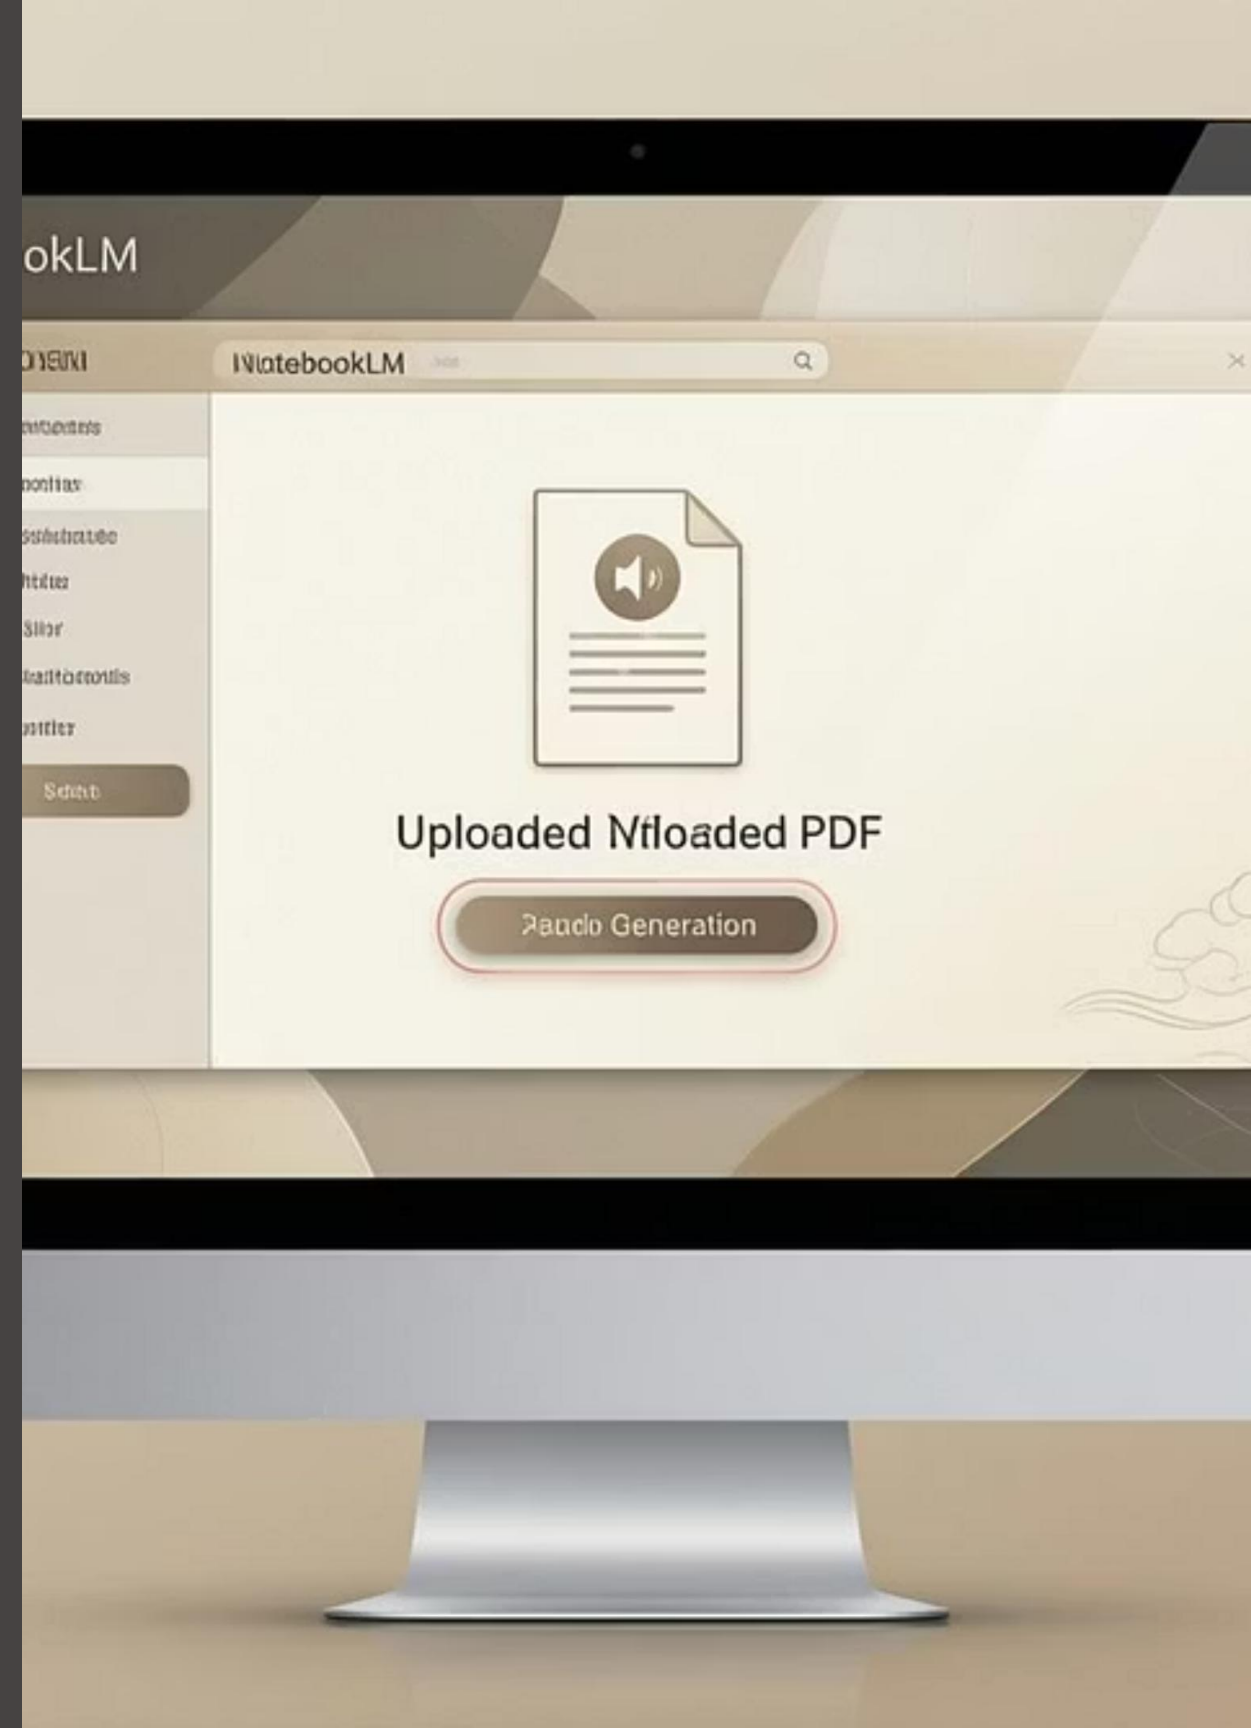

Generate the "Audio Overview" and play 30 seconds of the AI banter.

03

Step 3

Ask the chat: "Create a study guide with 5 key definitions from this text."

📌 **Goal:** Show students exactly how fast they can turn raw data into a study tool.

Ask Me Anything

Q&A

"How do I cite AI in my papers?"

"Is NotebookLM free?" (Yes, currently).

"Will my teacher know?" (Assume yes. Be transparent).

Your Competitive Advantage

Summary: The future isn't AI vs. Humans. It's **Humans who use AI** replacing Humans who don't.

Call to Action: Tonight, take one of your hardest class readings, upload it to NotebookLM, and try the Audio Overview feature.

"See you in the future!"
