An automatic classmate for educators that helps optimize student learning

We believe in providing technology and leadership resources to educators so that they can better serve their students through meaningful relationships. Auto Classmate helps educators by providing:

- ✓ Artificial Intelligence (AI) Tools
- ✓ Educator Thought Leadership
- ✓ Technology and Leadership Resources

Auto Classmate (autoclassmate.io)

The Operating system for the modern educators

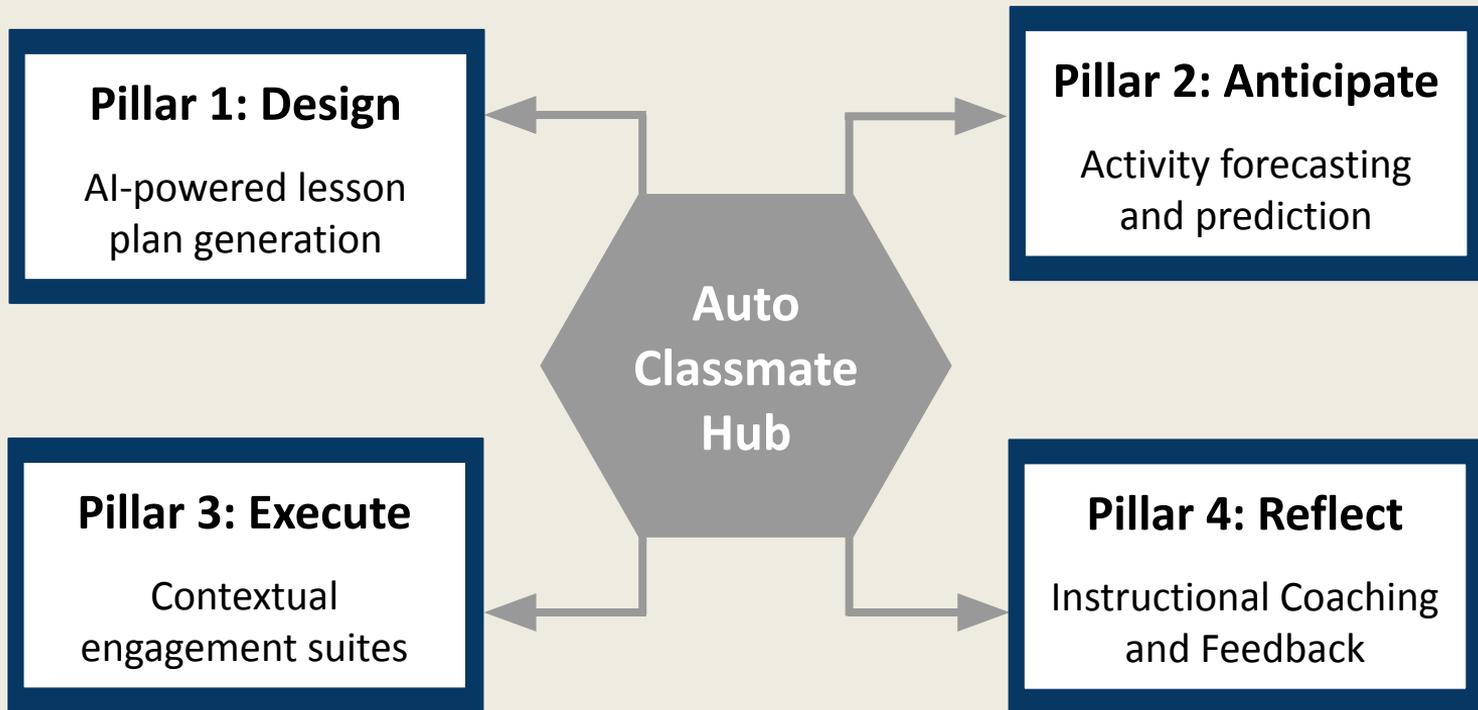

The Consequences: Time spent on structural logistics directly cannibalises the energy needed for meaningful classroom engagement, differentiated instruction, and student relationships.

The Reality: Teachers are spending hours, sometimes days, drafting lesson plans, mapping standards, and predicting classroom outcomes

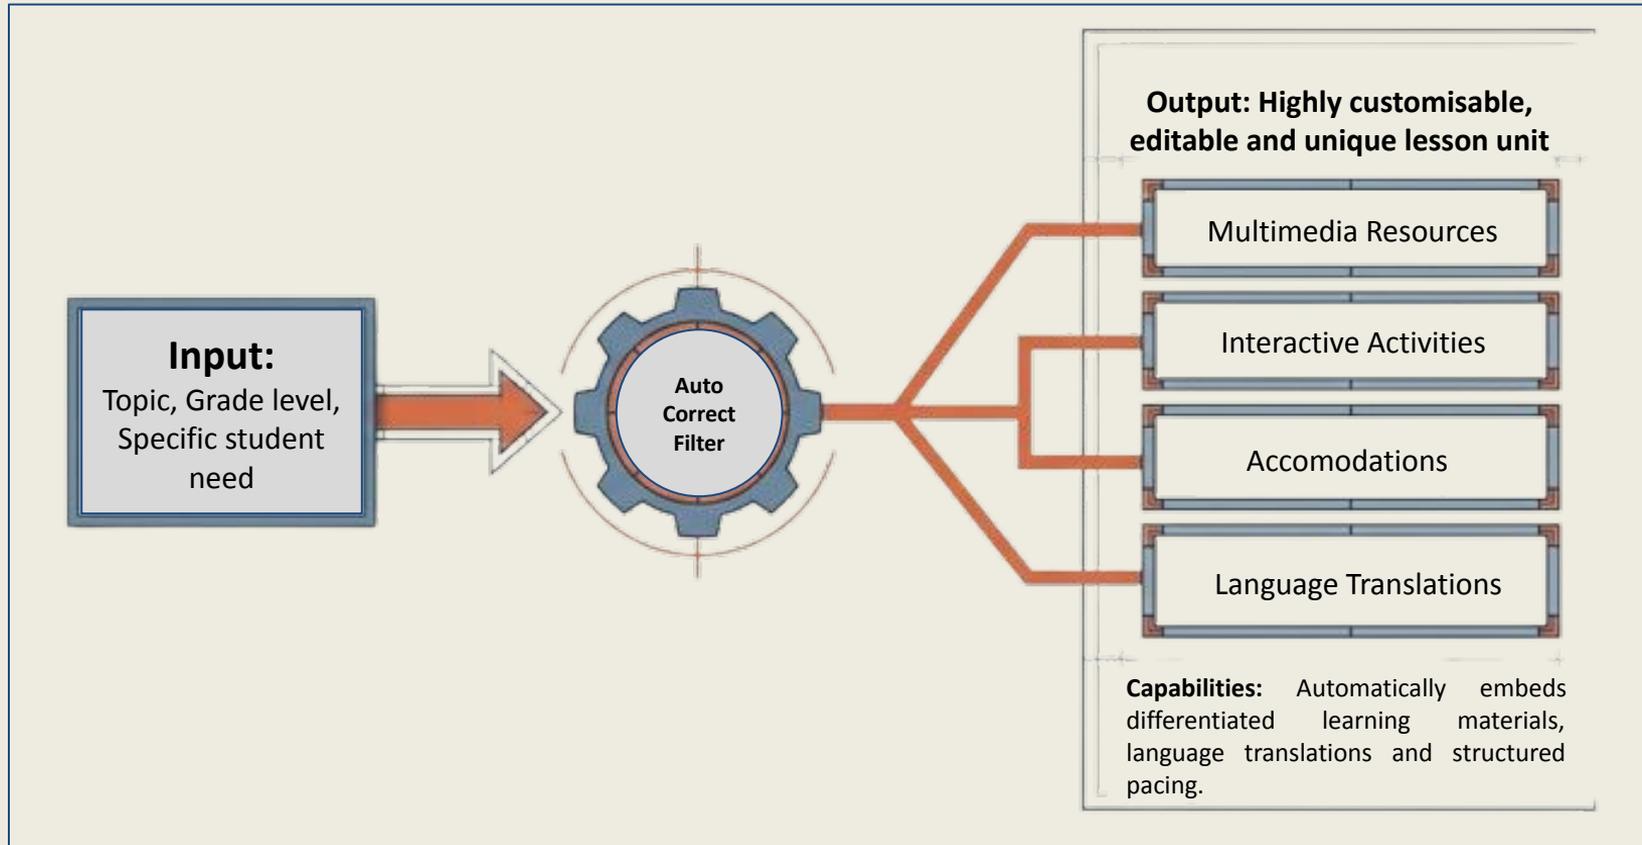

A Comprehensive ecosystem designed for educators workflow

Pillar 1: Design customisable lesson plans from a single prompt

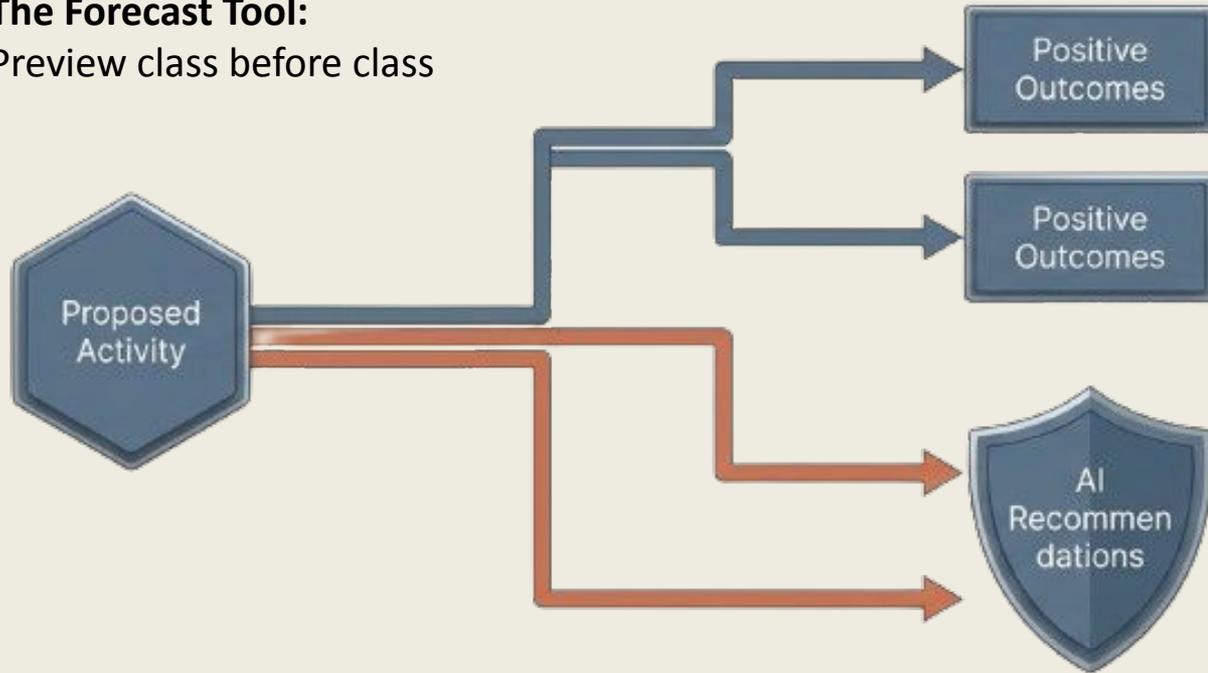

Pillar 2: Anticipate classroom dynamics before they happen

The Forecast Tool:

Preview class before class

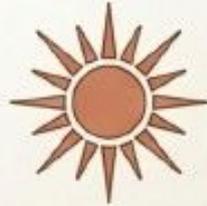

Predict: Generates two potential positive outcomes to maximise learning opportunities.

Protect: Identifies two potential negative outcomes or bottlenecks.

Adapt: Provides immediate, actionable recommendations to modify the lesson and avoid the negative outcomes entirely.

Pillar 3: Inject context and energy directly into the classroom (1/2)

Activation & Engagement Generator

Instantly produces three unique, dynamic engagement activities designed to add flare to any lesson plan, hooking students from minute one.

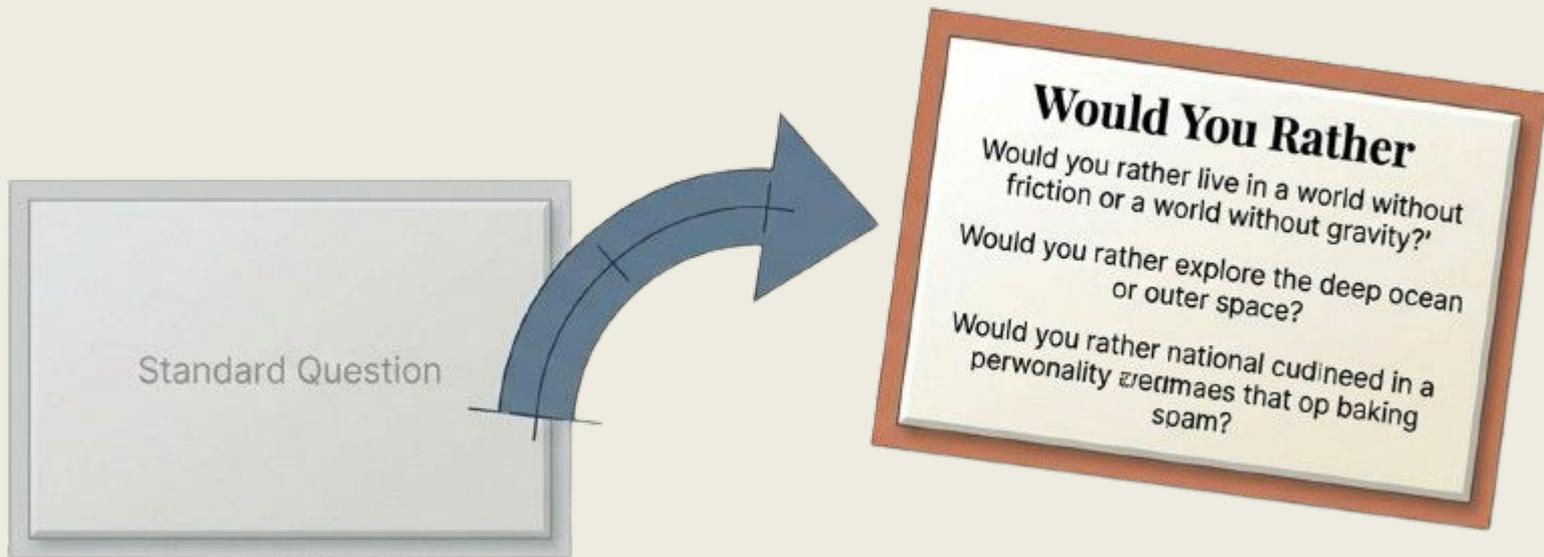

Contextual Learning Activity Generator

Generates three immersive activities that place students into specialized, contextualized roles (e.g., Lead Architect, Historical Journalist) to build, create, or design solutions.

Pillar 3: Instant engagement with targeted classroom hooks (2/2)

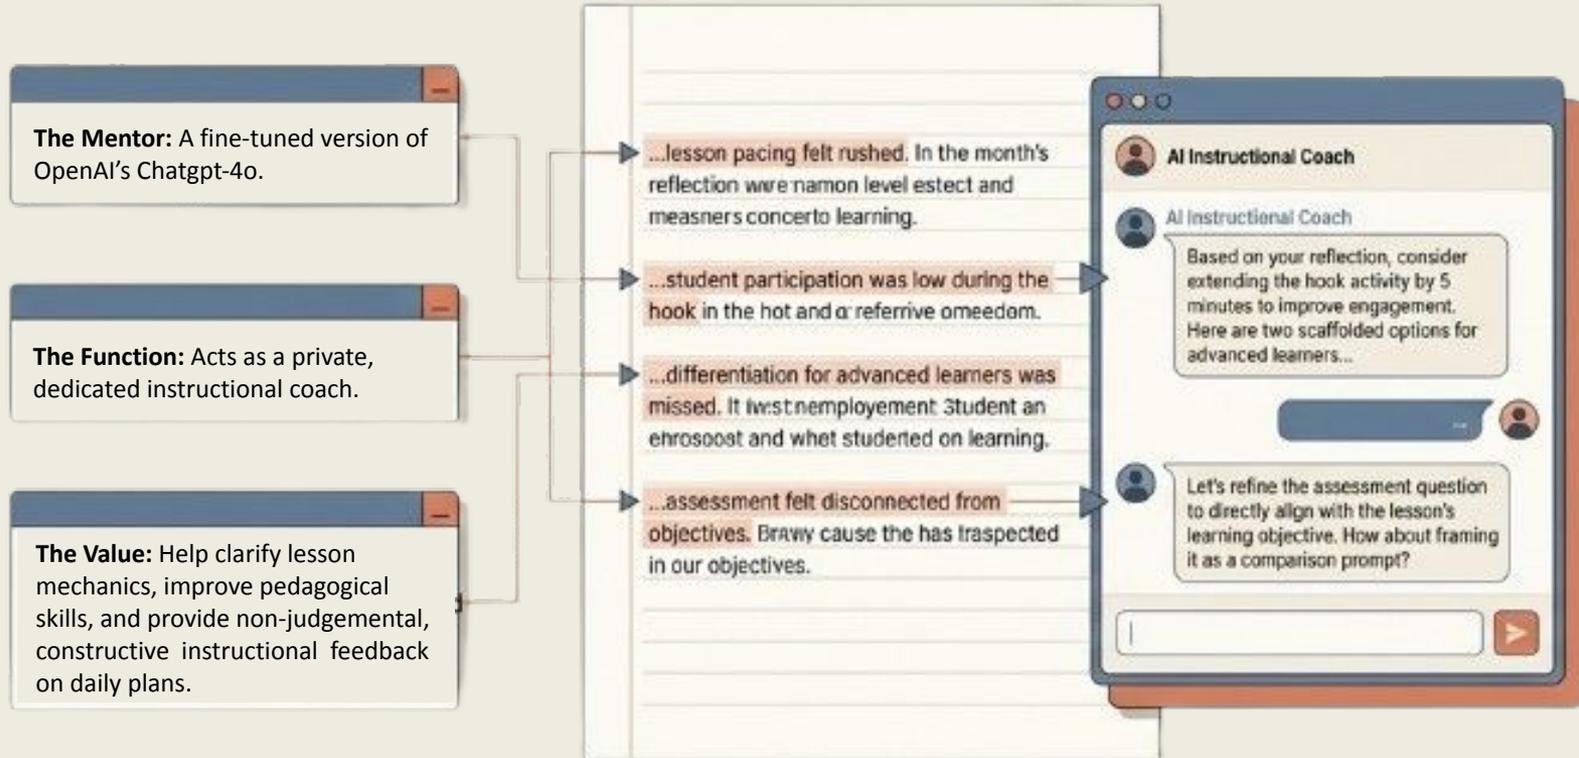

Tool: 'Would you rather' question generator

The Mechanism: Input grade level and specific content area

The Result: Instantly generates highly engaging, subject-specific problems that provoke critical thinking.

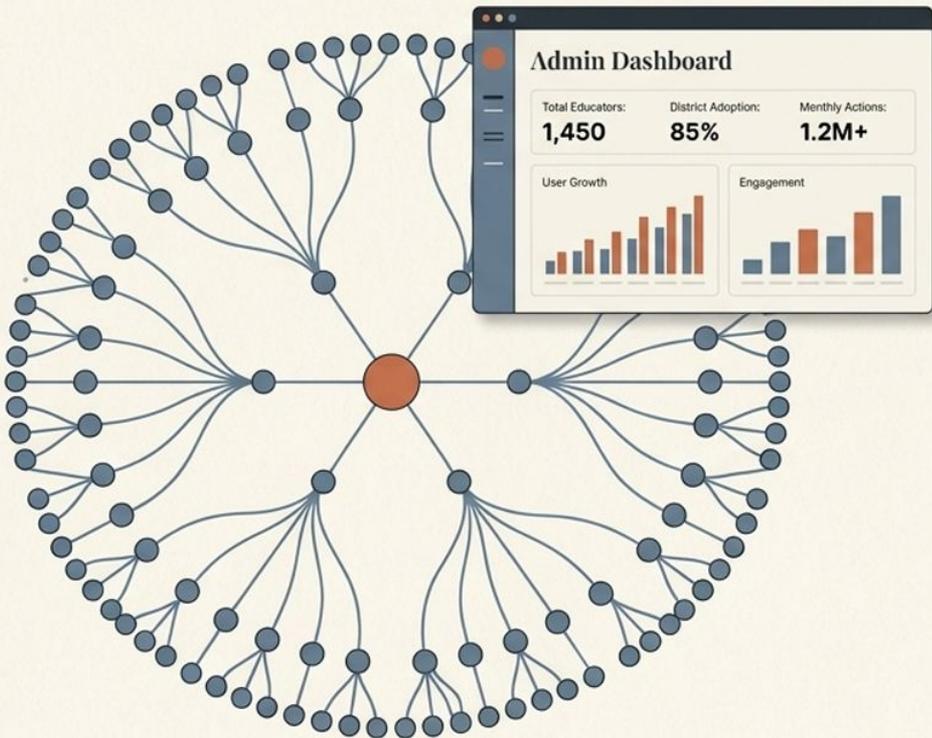

Pillar 4: Reflect and refine with an AI instructional coach

Scaling the ecosystem: School and district solutions

Custom Deployment: Bring Auto Classmate to the entire faculty.

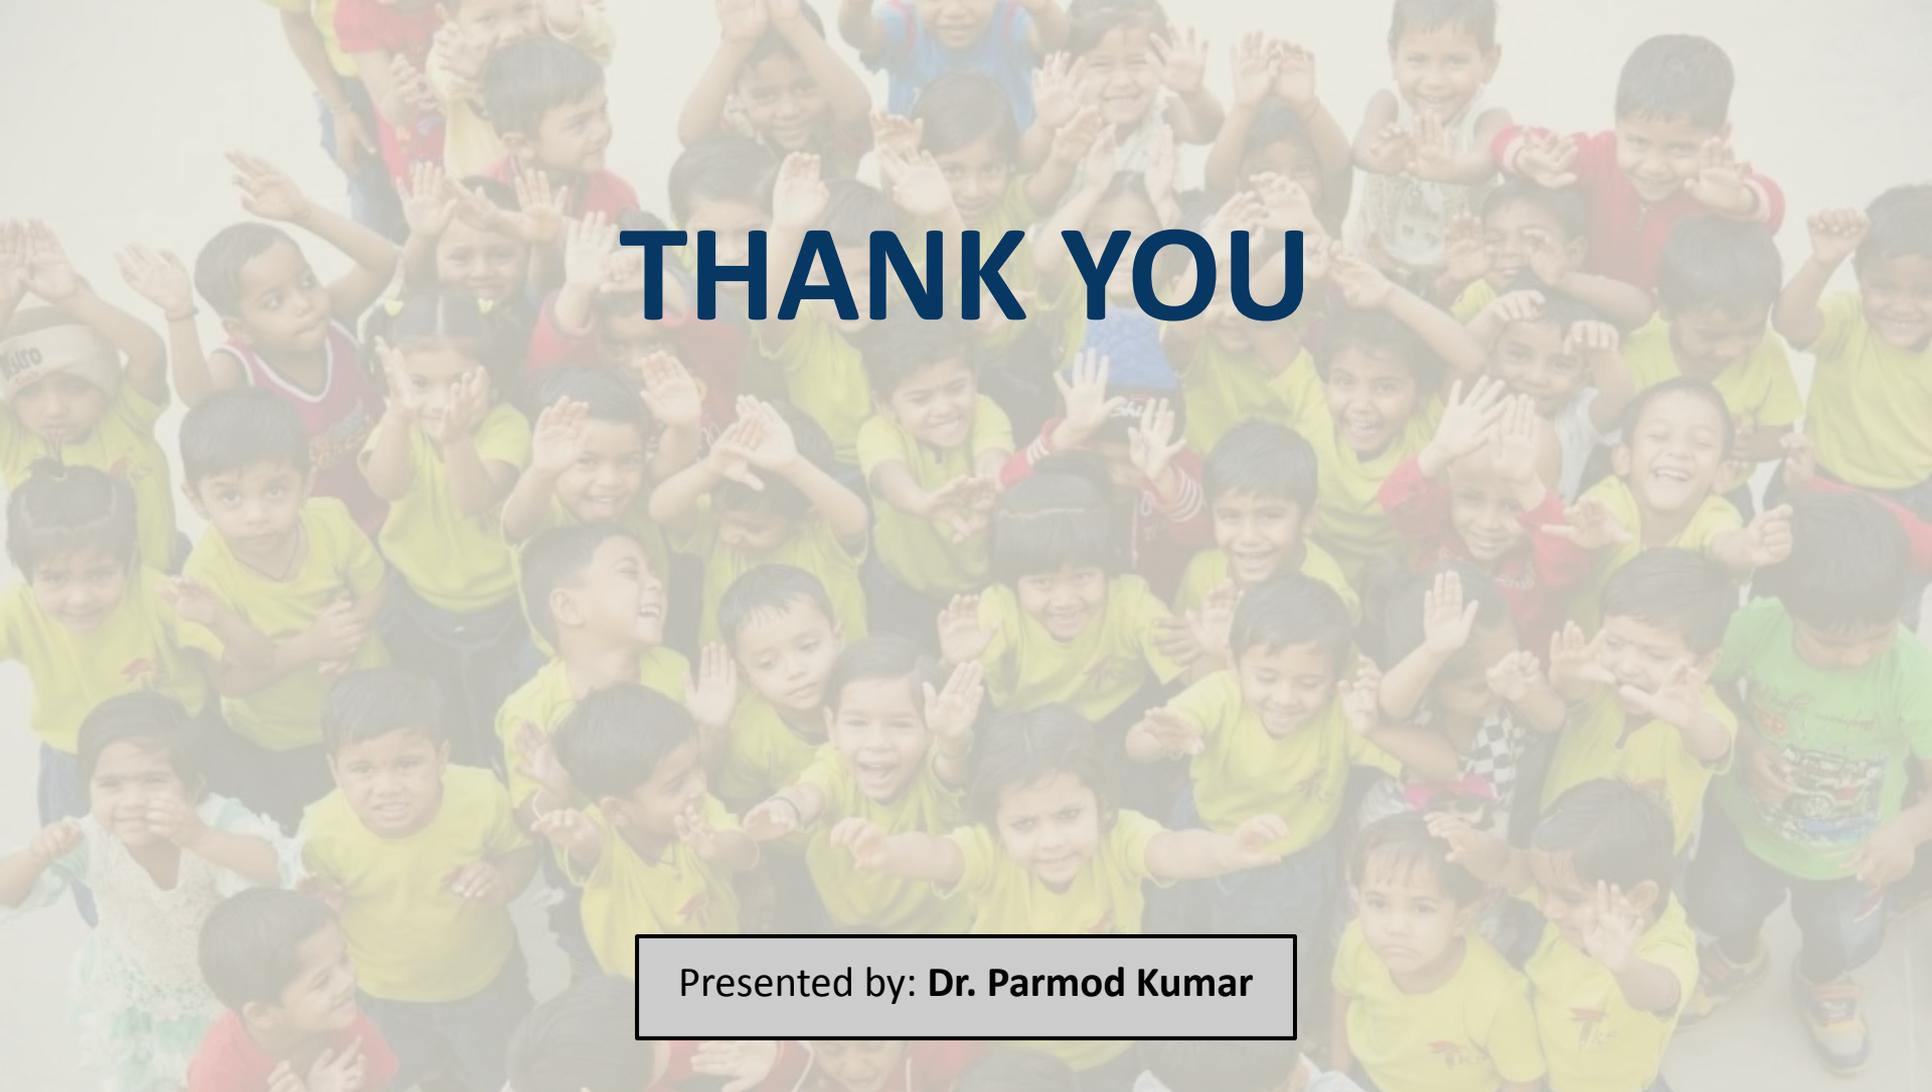

Bulk Economics: Tiered, discounted pricing models for school-wide and district-wide adoption.

Seamless Integration: Dedicated virtual training, structured onboarding, and continuous enterprise-level support to ensure high adoption rates and immediate ROI.

Beyond software: A community of continuous growth

 Quarterly Virtual Summits	 Virtual Courses	 Direct Impact
<p>Exclusive access to live events, thought leadership, and collaborative sessions with other forward-thinking educators.</p>	<p>Deep-dive professional development on the ethical, effective implementation of AI in the classroom.</p>	<p>Proceeds support the educators who actively design and build the tools on the platform.</p>

A large group of smiling children, many in yellow shirts, waving their hands. The children are of various ages and are looking towards the camera with joyful expressions. The background is a plain, light color.

THANK YOU
