MIND MAP

A Mind Map is a visual thinking tool, ideal for brainstorming, exploring ideas and presenting information in a uniquely visual way.

A Mind Map is a diagram for representing tasks, words, concepts, or items linked to and arranged around a central concept or subject using a non-linear graphical layout that allows the user to build an intuitive framework around a central concept.

BENEFITS OF MIND MAPPING

Mind Mapping basically avoids dull, linear thinking, jogging your creativity and making note taking fun again.

Mind Mapping removes the uncomfortable resistance of doing nothing.
