What is it?

Social Media

Is It.....

- social networking?
- social bookmarking?
- wiki?

An online platform that **doesn't** just give you information, but **interacts** with you while giving you that information. This interaction can be as simple as asking for your **comments** or letting you **vote** on an article. Social media, on the other hand, is a **two-way street** that gives you the ability to communicate too.

Social Media

Social Media includes:

- Social Bookmarking.
- Social News
- Social Networking.
- Social Photo and Video Sharing.
- Wikis.....
- *Any website that invites you to interact with the site and with other visitors falls into the definition of social media.*

Social Bookmarking

- A **social bookmarking** service is a centralized online service which enables users to add, annotate, edit, and share bookmarks of web documents.
- Delicious, founded in 2003, popularized the terms "social bookmarking" and "tagging".
- Tagging is a significant feature of social bookmarking systems, enabling users to organize their bookmarks in flexible ways and develop shared vocabularies known as folksonomies.

MISSION CONTROL

A History Of The Urban Dashboard

318 placesjournal.org · Cities

We know what rocket science looks like in the movies: a windowless bunker filled with blinking consoles, swivel chairs, and shirt-sleeved men in headsets nonchalantly relaying updates from "Houston" to outer space. Lately, that vision of Mission Control has taken over City Hall.

PAVING THE ROAD TO THE FINAL FRONTIER

Shaping Up: The Future Of U.S. Space Transportation

63 thespacereview.com · Space

Surprisingly, in 2014 the U.S. space transportation picture took shape in the sense that a viable way forward became clearer, although with no guarantee of ultimate success. NASA is not going to directly replace the Space Shuttle. That horse left the barn in 2009. The earlier demise of the Ares launch system as part of the cancellation of the Constellation program made that reality clear. Therefore, the question becomes, what now?

TOOLS AND TRICKS

GIFs

GIFs lighten the tone of your presentation and are a useful tool for quickly engaging (or re-engaging) your viewers. They're a great way to add humor in an otherwise mundane piece of content.

TOOLS: **Giphy**, **Veed.io**

ANIMATION

Animated videos, images, or words grab your viewer's attention much more effectively than a still or text-only image. Another power of animation is its capability to make complex ideas simple and relatable to any viewer who comes across it.

TOOLS: Powtoon, Invideo, Animaker, Moovly

Creating content for
social media

WHITEBOARD ANIMATION

Whiteboard animation is popular for how-to or explanatory videos, typically featuring a visual display of an unseen narrator's verbal explanation. This is a great medium for explainer videos that convey a product, process, or point of view.

TOOLS: VideoScribe, Animaker, Explaindio,
Mango Animate

Creating content for
social media

SCREEN RECORDING

Trying to teach tech? A screen recording shows your viewer *exactly* how to do what they need to do and how to navigate around an unfamiliar platform or UI.

TOOLS: Screencast-o-matic, Screencastify, OBS, Bandicam, Filmora

Creating content for
social media

IMAGES

You've heard that a picture is worth a thousand words. If you can use one to visualize your point, do it.

Creating content for
social media

INFOGRAPHICS

Infographics offer complex information or statistics in an easy-to-digest, impactful way. Charts and graphs help the viewer comprehend data quickly, in a way that's much simpler than explaining with words.

TOOLS: Infogram, Canva, Adobe Express

Creating content for
social media

DATA VISUALIZATION

Data visualization brings infographics to the next level. It takes huge data sets where it can be hard to understand trends, waves, and relationships between variables and visualizes them to help the views zoom out and see those relationships play out in front of them.
